

## Scientific Activities 2017/9/1- 2016/9/ 1

ورش العمل	الندوات والمؤتمرات	الدورات	المحاضرات	ت
flow cytometry	non	non	Cancer patients and weight loss syndrome	.1
Real time PCR application			The economic importance of the plants of the family Halochaе	.2
Immunohistochemistry, its diagnostic and research importance			horizontal gene transfer	.3
Microbial corrosion of materials			Histological and biochemical study of the protective effects of some volatile oils against the effects of methotrexate on some male organs of .laboratory rats	.4
			Isolation and identification of various dyes from environmental bacterial species and study of their biological activity as anti-bacterial and anti-fungal .agents	.5
			Study of internal and external parasites on different types of insects	.6
			Isolation and identification of some types of opportunistic amoebas from different clinical and environmental sources in Basra Governorate and study of their pathological effects on laboratory	.7

## Scientific Activities 2017/9/1- 2016/9/ 1

			.infections	
			A taxonomic and ecological study of parasitic flowering plants in Iraq	.8
			Study of seasonal variation of heavy metal pollution in Basra Governorate and the effect of exposure to cadmium and lead .on date palms	.9
			Isolation and identification of Candida fungi from the oral cavity of cancer patients with detection of the effectiveness of compounds for three medicinal plants	.10
			Immunohistochemistry, its diagnostic and research importance	.11
			Microbial corrosion of materials	.12
