Basra University organizes an electronic workshop on analyzing images and tissue sections electronically	Basra University organizes a symposium on the types of antifungals and their mechanisms of action		A panel discussion at the University of Basra discussing drought stress in palm trees	.1
Basra University organizes a workshop on biological treatment of crude oil production and refining problems			the phenotypic and molecular characterization of isolates of the fungus that causes wilt disease	.2
Basra University is preparing to hold an electronic workshop on the use of bacteria in the applications of bionanotechnologies			Basra University organizes a panel discussion on stomach germs	.3
Basra University organizes an electronic scientific workshop on the use of artificial intelligence in diagnosis			Basra University organizes a seminar on hepatitis viruses	.4
			Basra University organizes a panel discussion on diagnosing bacteria from the intensive care unit in Basra hospitals	.5
			Basra University organizes a panel discussion on studying the effectiveness of surfactants for	.6

			Pseudomonas bacteria	
			Basra University organizes a panel discussion on virulence factors in bacteria isolated from otitis media	.7
			Basra University organizes a panel discussion on the protective importance of compounds in medicinal plants	.8
			Basra University organizes a panel discussion on the role of the hormone phosphating	.9
			Basra University organizes a panel discussion on the physiological and histological effects of cirrhosis of the liver	.10
			Basra University organizes a panel discussion on infection .with stomach germs	.11
			The University of Basra discusses a master's thesis entitled the physiological effect of extracts of parasitic plants on the reproductive system	.12
			Basra University organizes a seminar on viral hepatitis	.13
			Basra University organizes an electronic seminar on the gene expression of enterotoxins	.14
			Isolation and identification of produced by some antibiotics filamentous bacteria	.15

Scientific Activities

2020

			Actinomycetes and study of their activities against pathogenic bacterial isolates	
			Basra University organizes an electronic seminar on the virulence factors of Pseudomonas bacteria	.16
			Basra University organizes an electronic seminar entitled Newcastle disease viruses and their role in fighting cancer	.17
			Basra University organizes an electronic seminar on the relationship of the aryl hydrocarbon receptor pathway and immune detection points in breast cancer	.18
			Study of risk factors, prevalence and colonization of Staphylococcus aureus	.19
			Basra University organizes an electronic seminar on (Preparation of silver nanoparticles using Pseudomonas stutzeri	.20
			Basra University organizes an electronic seminar on cirrhosis of the liver	.21
