## Obituary

In the obituary of the late Professor **Alim A-H Yacoub**, Professor **Thamer Hamdan** wrote in the Basra Journal of Surgery [1] saying: “Alim A-H Yacoub, Professor of Community Medicine, in Al Mustansiriyah Medical College, Baghdad, died on 31st of January 2004 because of a miserable car accident, his son **Yousef** was lost also in the same accident. For all of us, his family, friends, colleagues, he personified the best in all-round complete doctor. He was brought up in Basra, in a well-known respected and educated family since 1953, finished his secondary school in 1970, then moved to Basra Medical College, where he proved himself for six years as an outstanding student, always the first in his class. After his graduation from Basra Medical College in 1977, he stayed two years as a resident doctor, then he departed to

UK to join London School of Tropical Medicine where he finished his Ph.D. thesis with, again, outstanding degree. His thesis was considered the first in the year of his graduation and for this reason he was given honorary medal. Then he achieved the membership of the Royal College of Community Medicine. After his graduation he moved back to his home city Basra, and started active participation in teaching, both under and post graduate students in the department of Community Medicine for several years. He proved himself as a well - disciplined hard working gentleman with a strong desire to move quickly forward. In 1993 he was appointed as Dean to Basra Medical College where he tried his best to lift up the scientific level. He was well-known for being strict and scientific”. “He reached he professorship status in 1995 because of his distinguished writings. Finally, he moved to the capital of Iraq where he had the chair of Dean of Al-Mustansiriyah Medical College. He had very good relation with the WHO throughout the period of his service in Iraq and then he was appointed as a representative in the Middle East. The departure of Professor Alim, hopefully for heaven, was very much disappointing for all of us, we felt it was a real loss of academic person, the country in disparate need for his service, we ask **God** to forgive him, to be kind and helpful to him. Certainly we shall never forget him, he is alive by his wife **Saba**, his son **Ahmed**, and his daughter **Noor**”.
