

Course description of the program offered by Basrah University

2022 - 2023

Lecturer . Dr Wasan Abd al ameirSayhood

University of Basrah ,College of medicine	1- university and college
Microbiology	2-department
Microbiology	3- course
Classroom for theory clinical skills laboratory,	4- available methods of attendance
2023 - 2022	3- year
	6- hours\ course
29\8\2023	10-Date of production
Aim of programme: -high level of scientific knowledge - high level of practical skill -	
Learning outcome , teaching , learning and assessment methods	
cognativegoals : - Dissemination of knowledge about microbiology - -student should acquired skills in the field of speciality - Teaching different methods of laboratory diagnosis	

skill goals special to the programme:

- Skills and knowledge of pathogenic microorganisms
-

learning and teaching

- Interactive lectures including theoretical material
- Lectures
- Practical laboratory skills

Assessment method:

Short examination after discussion

Evaluation of practical performance through logbook

Evaluation of practical performance at the end of the course

Mid-year and final examine

Course structure

Method of assessemen	Method of teaching	subject	Learning outcome	hours	week
----------------------	--------------------	---------	------------------	-------	------

t					
Discussion Short examine questions	Lectures	Principles of microbiology	Parvo virus	1	1
Discussion Short examine questions	Lectures	Principles of virology	HIV virus	1	2
Discussion Short examine questions	Lectures	Medical virology	Oncogenic viruses	1	3
Discussion Short examine questions	Lectures	Medical virology	Hepatitis viruses	1	4
Discussion Short examine questions	Lectures	Medical virology	Viral gastroenteritis	1	5

Infra structure	
Jawetz Medical Microbiology	Books required reading:

-	* * * * *
1- Jawetz Medical Microbiology 2- Bailey and Scott Diagnostic microbiology 3- Finegold and Baron Medical microbiology 4- Macki and Maccartney Diagnostic microbiology	Main references
Medical Journals in google scholar. WHO reports. Pub med journals --	Recommended books and journals
Web sites in medical microbiology. ASM. website	electronic references and web sites- - -

The planned development plan :

Uses of modern teaching methods

Adopted modern sources

Access to corresponding universities courses

Periodic meetings of development committees

Periodic update of lectures

Attending workshops and seminars for teaching and learning methods
