Faculty of Administration and
Economics
For the academic year 2022-2023

Scientific plan Section of Financial and Banking Sciences 2022/2023

First: vision, mission and goals

Vision: The Department of Financial and Banking Sciences should be at the forefront of the financial and banking sciences departments in Iraq, while committing to excellence in the three main pillars of university education: teaching, scientific research and community service.

The message: To achieve this vision, the department directs its activities to achieve the following messages:

Providing a distinct quality of high quality in student education that is compatible and the need of the labor market.

- 1- Developing and developing the capabilities of the faculty members in the teaching and research field.
- 2- Providing consulting and training services through a close relationship with society.

Strategic goals:

- 1-Numbers highly qualified graduates who are able to compete in the entry of the labor market easily. They are able to continue postgraduate studies, in a way that keeps pace with the scientific development in the field of financial and banking sciences and supplying banking and financial institutions in Iraq with the qualified graduates to manage and develop it.
- 2- Keeping pace with global and local developments in the field of financial and banking science.
- 3- Increasing the ability to think, analyze and creativity for the students of the department.
- 4- Developing the student's technological skills related to investment and financial markets.

Second: The teaching staff for the academic year 2022-2023

Fifteenth: Other scientific activities

Academic accreditation plan

The department seeks to obtain academic accreditation, as the Academic Accreditation Committee has been formed in the department. The department seeks to take the necessary measures to keep pace with international universities through an investigation:

- 1- Education quality
- 2- A plan to train students well to manage tasks at work and financial markets
- 3- Supporting student education and providing learning sources
- 4- Improving the scientific level of the department students and a teaching staff
- 5- Providing a better teaching climate for students and teachers
- 6- Create appropriate opportunities to meet the section of the section of scientific competencies

Curricula development plan

Suggestions were put in place to develop the curricula and submit them to the sectoral committee in order to harmonize the vocabulary of the curricula of the economy with the requirements of the labor market:

- 1- Updating curricula according to the ministerial instructions⁵
- 2- Adopting the English language subject in the curriculum
Depending on the curricula with a modern edition
- 4- Teaching computers (theoretical- practical) by a specialized teaching staff (computer science) and based on modern curricula to keep pace with scientific development.
- 5- Providing computer laboratories with modern capacity and technology and the numbers of computers that suit the numbers of students

6-Take advantage of external teaching experiences (in the event that they are not available locally or rarely) to open new sections in evening teaching.
