## REPORT MATCHING WITH STANDARDS

The concept of quality Assurance and academic accreditation carries with it major concepts, which are:
1 -Standards
2 -Evaluation and evaluation
3 -Dependence
This implicitly means the commitment of the educational institution, whether it is a university, a college or a department to provide academic and educational services with specific criteria, through the use of evaluation and evaluation mechanisms, may be internal or external to obtain the required accreditation.

1-Standards
The criteria mean the specifications necessary for education that can be accepted to ensure its quality and increase its effectiveness and its ability to compete, and as a reference measure that can be guided when assessing university performance, by comparing it with the desired standard levels and the standards are divided into two types:
The first type - standard criteria: the foundations that the quality assurance and accreditation center sets. It represents the minimum standards that the Foundation must fulfill in its educational programs.
The second type - approved criteria: It is the foundations that the educational institution defines itself, and is adopted by the Center for the Quality Assurance and Adoption of Educational Institutions, provided that it is not less than the level of standard standards.

## 2-Evaluation and evaluation

The concepts of evaluation and evaluation that they lead us to measure the performance of the educational institution or the educational program.
Definition of evaluation: the process of measuring the quality of performance in all activities with the aim of continuous improvement of future performance.
Definition of the evaluation: a set of procedures and methods taken based on the evaluation results, ensuring the implementation of the accepted standards to achieve the levels of target quality in the educational institution

## 3-Dependence

It is an academic position granted to the educational institution or the educational program in exchange for fulfilling approved and announced standards by the accreditation authorities, with the aim of improving and developing the educational institutions and programs provided, while keeping pace with the requirements of the labor market and development. Any set of procedures and scientific women undertaken by the center in order to ensure that the institution has achieved the conditions of quality specifications and their guarantee, and that its programs are compatible with the approved and announced standards and the educational institution is approved based on two credits:

Institutional dependence - it means ensuring that the institution has the ability and capabilities to implement its mission and its approved goals in accordance with specific criteria.
Program accreditation - Program evaluation of an educational institution that holds institutional accreditation, to ensure the quality of these programs and the extent of their achievement of the requirements of the certificate granted in accordance with the declared criteria and controls, and the recognition that the educational program in it has achieved or reached the minimum at the very least of quality standards.
The process of applying quality and dependence in university education is based on six foundations and pillars:
1 -Requesting relaxation.
2 -Institutional initial accreditation.

5 -The final program accreditation.
6- quality assurance.

The Business Administration Department seeks to obtain the final program accreditation, but in order to obtain specialized international accreditation, as the national accreditation (national classification) constitutes the key to obtaining international accreditation, therefore the question that arises now is: How to obtain a specialized international academic accreditation, this also drives us to search for what is international academic accreditation
International accreditation is generally intended to recognize and leave the educational program, as it performs the evaluation process or a specialized international body in accordance with specific and declared criteria, and acknowledges that the resident program has achieved or reached the required limit of the declared criteria.
As for the school or the specialized association for the scientific departments program of the College of Administration and Economics in obtaining international accreditation, the American Association of AACSB business colleges and schools
Association to advance collegiate schools of business

The steps for obtaining a professional specialized international accreditation are determined by AACSB
1 -The institution that wants to obtain accreditation applies to AACSB.
2 -The institution intended to be approved is required to provide the required documents for accreditation. Perhaps the most important of these documents:
1 -The self-evaluation report, which reviews the evaluation of the current situation of the institution or the program, includes identifying strengths and weaknesses in the academic approach, administrative system, social responsibility, and monitoring academic and research scientific contributions for college members.
2 -The teaching staff, employees, students and representatives of the labor market must be involved, whether from the government or private sector.
3 -Working to align its strategic goals with the AACSB accreditation criteria
The program is to obtain accreditation
4-Preparing the strategic plan.

AACSB standards are also divided into four main pillars, each of which includes a number of criteria, which are as follows:
The first focus: strategic management and innovation
1 -Participation, influence, innovation
2 -Intellectual contributions, impact and alignment with the task
3 -Financial strategies and resource allocation The second focus: Participants - students, college and technical staff
1- Accepting students, progress and job development
2-Sufficiency and spread
3-College management and support
4-The professional competence of the employees and its publication

## The third focus: teaching and learning

1-Curricula management and learning guarantee
2-Curricula content
3-Student interactions in the program
4-Scientific level educational level, structure, and equation
5-Teaching effectiveness.

Fourth focus: academic and professional participation.
1-Academic and professional student participation.
