Historical overview college was established on 9/1/1971 under the decision of the Council of Higher Education and Scientific Research No. (Council / D / 3 / A / 5 / S / A) in its third session. The duration of study in the college is four years, bringing the number of batches that graduated from bachelor's degree holders to (49) batch. Its scientific structure was strengthened and its cognitive and social responsibility deepened by opening graduate studies in the Department of Economics in the academic year 1982/1983 for the master's program. The PhD. program in the academic year 1986/1987 and the higher diploma program opened in the Department of Economics in the academic year 2012/2013. And the Department of Business Administration for the academic year (2015-2016).

College Vision College of Administration and Economics at the University of Basra aspires to be among the world's distinguished colleges in the economic, administrative, financial and accounting fields, and to be distinguished scientifically and administratively and in the quality of service it provides to the community and stakeholders at the national, Arab and international levels, and to adhere to the academic professional culture among academics and employees, as well as to pursue the prospects of development in the academic practical aspects of the university (educational, research and service).

College Mission College of Administration and Economics at the University of Basra seeks to provide the best service to the community and the parties that exchange interests and benefits with it, and with the university, through an accurate diagnosis of their local needs and future expectations, and to achieve an effective and efficient response to these needs and expectations by ensuring the quality of all university processes and practices in the college (educational / research / advisory / administrative). According to the following...

1. Better investment of the college's resources and energies through effective commitment to the application of the provisions of the quality assurance system and academic accreditation related to the allocation of resources.
2. Improving the performance of human resources (academic and functional staff) by participating in specialized and advanced training and development courses inside and outside the country.
3. Preparing plans and programs that ensure the use of resources (material, financial and technical) available to the college in improving the overall performance of the college.
4. The participation of all bodies (academic and functional) and students in decisions and practices related to them, and those that contribute to the development of the college's work and improve its performance.
5. Develop a comprehensive plan that ensures the creation of requirements, requirements and mechanisms that make the student outputs of the college respond to the labor market and the satisfaction of stakeholders.
6. Investing feedback information in improving the future performance of the college

Strategic Objectives

1. Setting goals and plans that enable improving the scientific level of the college (students and teaching staff).
2. Developing plans and mechanisms that enable the pursuit of scientific and knowledge development in the field of specializations of the college.
3. Creating requirements that enable a better teaching environment for students and teachers...
4. Providing appropriate opportunities to meet the college's need for scientific competencies.....
4. Develop plans and provide the supplies that have Be of improvement and expansion in responding to the labor market and serving the community

العمل على تنفيذ المتطلبات واتخاذ الإجراءات التي تمكن الكلية من الحصول على شهادة الاعتماد الأكاديمي.
