## **Scientific plan model for scientific departments**

**College of Administration and Economics**

**Management information system department**

**For the academic year 2025-2026**

**translated by /translator : Aya Imad Fawzi**

## **First: Vision, mission and goals**

### **Vision:**

The vision of the Department of Management Information Systems is to provide students with academic knowledge about the basics of business administration and software, computer languages and technologies, information and communications systems, as well as practical skills knowledge about the use of administrative, productivity, marketing and human resources applications by adopting computers and information and communications technologies. We seek excellence and leadership scientifically and practically in a social educational environment that is open to the future.

### **Mission:**

The mission of the Department of Management Information Systems is to spread science and knowledge in the fields of management, economics, computers, and decision-making. The department seeks to raise the employment rate of its graduates by providing them with practical and scientific competencies and skills in the field of management information systems and business technology to support the development towards the knowledge economy and information society by establishing partnerships with the business sector and giving greater attention to the applied aspect of information systems in the business sector.

### **strategic goals:**

The Department of Management Information Systems aims to prepare the student cognitively and professionally in the field of information systems and their applications and the use of information and communication technologies in business organizations and public administration at the initial and postgraduate levels. Thus, an efficient cadre capable of meeting the needs of society in the labor market will be prepared from specialists in this field.

It also seeks to provide high-quality education in the field of management information systems and business technology to students in a manner consistent with their diverse interests and professional expectations and commensurate with the needs of the labor market.

- Prepare students to apply their knowledge in the field of work using problem-solving tools and techniques.
- Preparing students for lifelong learning by giving them the knowledge and skills necessary for scientific research and decision-making.
- Increasing cooperation with the business sector, which enriches the scientific and applied skills of graduates to help them find job opportunities after graduation.
- Commitment to high professionalism and continuous improvement in the teaching and learning process in line with the quality guidelines followed at the university.
- Building partnerships and communicating with organizations in the public and private sectors to touch and understand problems related to informatics to provide creative solutions based on sound scientific and cognitive foundations.

- Ensuring the department's academic excellence by focusing on scholarships for distinguished and qualified students, providing and updating scientific sources such as books, scientific journals, and databases, and enhancing the scientific capabilities of faculty members by encouraging them to participate in conferences, workshops, and courses.
