Academic Program and Course Description Guide

2026

Academic Program Description Template

University Name: University of Basrah

College/Institute: College of Agriculture

Academic Department: Animal Production Department

Academic or Professional Program Name: Bachelor of Science in Animal Production

Final Degree Name: Bachelor's Degree

Study System: Semester-based

Description Preparation Date: June 10, 2026

File Completion Date: June 20, 2026

Signature :

Head of Department Name: Asst. Prof. Dr. Jalal Okali Usur:

Date: June 20, 2026

Approval of the Scientific Assistant:

Prof. Dr. Sadiq Jabbar Mohsin

File Verified by:

Quality Assurance and University Performance Unit

Name of Quality Assurance and University Performance Unit Director:

Prof. Dr. Aqeel Abboud Suhaim

Date: June 20, 2026

Dean's Approval:

Prof. Dr. Sarmad Ghazi Mohammed

Introduction

The educational program is a well—planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job markets. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program. The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments. This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide. This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work. In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a

brief summary of its vision, mission and objectives, including an accurate description

of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics

of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It

is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be

sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve

them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and

observable.

Curriculum Structure: All courses / subjects included in the academic program

according to the approved learning system (quarterly, annual, Bologna Process)

whether it is a requirement (ministry, university, college and scientific department)

with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired

by students after the successful completion of the academic program and must

determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra—curricular activities to achieve the learning outcomes of the program.

1. Program Vision

Preparing and qualifying trained technical cadres capable of providing the private sector and relevant government institutions (faculties of agriculture - Ministry of Agriculture and its affiliated departments - specialized institutions and research centers) with scientific competencies and distinguished technical expertise in animal production that help improve and increase the domestic product of the food basket to achieve an economic return and make a qualitative leap in performance commensurate with the population increase and the requirements of the labor market and keep pace with development and global development. The Department of Animal Production, through the College of Agriculture, aspires to be a

2. Program Mission

Encouraging young graduates of preparatory schools and agricultural institutes to engage in agricultural academic training for Iraqi colleges of agriculture to ensure that they obtain future job opportunities that serve the labor market and develop the foundations of sustainable development in Iraq to enhance food security.

Commitment to prepare agricultural engineers who keep pace with the needs of the labor market capable of competing and contributing to the development of the fields of animal production and following the latest advanced educational systems, and applying systems to preserve the environment and serve the community:

3. Program Objectives

- 1 -Investing the energy of the youth in the government agricultural program and withdrawing them from focusing on some of the bloated specializations.
- 2 -The use of modern scientific techniques in achieving the highest economic returns in light of the increasing production cost changes as a result of the pressure of climate change and competition with major global producers, and the development of work methods through electronic governance.
- 3 -Increasing the domestic product of food by local hands and efficiency and reducing dependence on foreign imports.
- 4 -Supporting investment and research funding for applied pioneering projects in the field of animal production sciences for the public and private sectors.
- 5 -Qualifying and developing scientific cadres of teachers, technicians and distinguished students through training courses and workshops that simulate the labor market and sustainable development, and supporting fellowships and scholarships to achieve leadership and excellence in animal production sciences.
- 6 -Supporting and marketing applied research in the field of animal production.
- 7 -Activating relations with universities, research centers and advanced international scientific institutions in the field of animal production.
- 8 -Developing a culture of voluntary community service and cooperation with the private sector in the field of animal production to contribute to raising awareness, applying modern experiences and stabilizing the market.
- 9 -Effective contribution to enhancing the university's position and classification internationally through distinguished studies and research in animal production and publishing in sober scientific journals.
- 10 -Periodic review of the curricula of the Department of Animal Production / Colleges of Agriculture in Iraq in preliminary and postgraduate studies in accordance with the standards

4. Program Accreditation

Department Requirements	35	126	76.83%	Basic Course
Summer Training	1			Basic Course
Others			100%	

*This can include notes whether the course is basic or optional.

7. Program Description				
Year/Level	Course Code	Course Name	Credit Hours	
Third Stage First course	ANPH312	Animal Physiology	2	3
	HAMA313	Hatching and Hatches Management	2	3
	ANNU314	Animal Nutrition	2	3
	ANEC315	Animal Production Economics	3	-
	ANBE316	Environment and Animal Behavior	2	-
	DAEX327	Design and Analysis of Experiments	2	3
	MEIN343	Medical and Veterinary Insects	2	3
Third Stage Second course	POPH317	Poultry Physiology	2	3
	POTE318	Poultry Products Technology	2	3
	FERA319	Feed and Rations	2	3
	ANPA320	Animal Pathology	2	3
	ANBR321	Animal Breeding	2	3

	REPH322	Reproductive Physiology	2	3
Fourth Stage First course	PONU412	Poultry Nutrition	2	3
	POBR413	Poultry Breeding	2	3
	SHPR419	Sheep and Goats Production	2	3
	MPRO415	Meat Production	2	3
	POPR416	Poultry Management and Production	2	3
	PAMA417	Pasture Managements	2	3
	GRPR421	Graduation Project/1	-	3
Fourth Stage Second course	POPA418	Poultry Pathology	2	3
	MOBI414	Molecular Biology	2	3
	CAPR420	Dairy Cattle Production	2	3
	MESC424	Meat Science	2	3
	BUPR425	Buffalo Production	2	-
	SEM423	Seminar	1	-
	GRPR422	Graduation Project/2	-	3

8. Expected Learning Outcomes of Program

Knowledge

A/1: Knowing the most important animals that can contribute to increasing a certain type of animal production.

A/2: Knowing the most important types of animals prevalent in the region and thus finding a program to breed them and increase their production.

A/3: Finding a balance between growing crops to feed humans and fodder crops used in feeding animals.

A/4: Identifying the most important compounds and elements needed by animals.

A/5: Harvesting plants at appropriate times that can benefit the producer and then the animal.

A/6: Trying to raise the product from field crops and animal production alike.

Skills

B/1: Recognize and learn about different animals and the most famous breeds worldwide.

1: Enable the student to communicate with modern sciences related to his specialty and other agricultural specialties.

B/2: Knowing the requirements necessary for any type of production and the ideal conditions that suit these animals.

2: Lectures, seminars, and discussion sessions.

B/3: The field operations necessary for farm animals.

3: Field practice and scientific laboratories.

B/4: Enable students to solve problems related to diseases.

4: Scientific trips

Ethics

C/1: Gather sources and verify the solutions followed in solving problems related to the topic. C/2: Interpret the results by reviewing research, sources, and direct inquiry from specialists. C/3: Find integrated programs related to animal production and try to apply and disseminate them to improve the reality of production. 4. C4: Find integrated programs related to animal production and try to apply and disseminate them to improve the reality of production.	1. Ask questions and answer them inside the study hall. 2. Raise environmental and scientific problems and try to find solutions. 3. Establish the correct foundations for scientific thinking. 4. Develop research project plans to solve a specific problem.
---	---

9. Teaching and Learning Strategies

This is done through theoretical and practical lectures related to the curriculum, as well as the scientific application of lessons that require it. It is achieved through methods of discussion and debate, directing questions to students, using modern presentation tools, organizing festivals, and employing modern methods and techniques in teaching methods.

1. Lecture
2. Discussion and dialogue
3. Enrichment questions
4. Direct questioning

10. Evaluation Methods

- Periodic, monthly, and daily exams.
- • Field practice.
- • Discussion of graduation projects.
- • Extracurricular activities.
- • Various homework assignments and writing scientific reports on practical laboratory experiments.
- Graduation research discussion tests Graduation Research Discussion Tests

11. Faculty

Faculty Members

Professional Development

Monitoring New Faculty Members

- ✓ Guiding new faculty members into academic work.
- ✓ Working on diversifying classroom management methods and involving them in
- ✓ practical lectures and presentations.
- ✓ Conducting personal interviews to assess the teaching competence and skills of the
- ✓ faculty member.
- ✓ Involving them in publishing research in internationally recognized journals with
- ✓ impact factors, writing books, and participating in workshops and conferences.

Professional Development for Faculty Members

- 1- Communicating newly acquired knowledge, information, and research findings to the faculty and linking them to daily work experiences.
- 2- Providing educational opportunities for faculty members to access and gain new information, knowledge, and modern experiences for professional growth.
- 3- Establishing integration between continuing education programs and production, health, and professional institutions.
- 4- Achieving integration between formal education and continuing education through the

12. Acceptance Criterion

(1- Admission requirements for the college:

The admission process follows the guidelines and procedures set by the Ministry of Higher Education and Scientific Research - Central Admission Department. Graduates of the preparatory stage (scientific branch) are nominated for admission to the college based on their graduation averages.

2- Admission requirements for the scientific department:

Students are allowed to select their preferred department from among multiple options based on priority.

The student's GPA in the desired department is taken into consideration.

The capacity and enrollment limit of the scientific department are considered during the admission process.

13. The Most Important Sources of Information About The Program

State briefly the sources of information about the program.

14. Program Development Plan

- ✓ Regular evaluation and review of the program, based on recommendations or
- ✓ proposals resulting from the annual reports of the programs and course reports.
- ✓ Developments that have occurred in the field of the program in terms of scientific
- ✓ and technological aspects, as well as research recommendations and studies.
- ✓ Market variables, available job opportunities, and their requirements.
- ✓ Recommendations from the university or external institutions for the development
- ✓ of existing programs.
- ✓ Results of surveys conducted among the beneficiaries of the graduates.
- ✓ Passage of five years or more since the implementation of the curriculum and
- ✓ completion of the feedback loop.

12	5	A detailed explanation of the	In breeding 'Line breeding ' Out breeding	Lectures Theoretical and practical	the exams Daily and monthly
13	5	Introducing students to genetic	Heritability	Lectures Theoretical and practical	the exams Daily and monthly
14	5	Introducing students to how to	Heritability calculation Methods	Lectures Theoretical and practical	the exams Daily and monthly
15		Exame			

11. Course Evaluation

- Daily exams with multiple-choice questions that require scientific skills.
- Daily exams with scientific questions.
- Participation grades for competition questions for academic subjects.
- Marking homework and reports
- Grades for the student's activity during the lecture and the extent of his commitment to regular attendance and absence.

12. Learning and Teaching Sources

Required Textbooks (Curricular Books, If Any)	Salah Jalal and Hassan Karam (2003). Animal Breeding - Anglo-Egyptian Library - Arab Republic of Egypt.
Main References (Sources)	-Victor Thar Rice and others, translated by Naguib Tawfiq Ghazal. Animal Breeding in farm animals - University of Mosul – Iraq - Khaled Hamed Hassan (2011). poultry Breeding - Ministry of Higher Education and Scientific Research
Recommended Books and References (Scientific Journals, Reports...)	Various classification research and university theses domestic in Animal breeding
Electronic References, Websites	https://agr.mu.edu.iq/wp-content/uploads/2021/02/%D8%A7%D8%B3%D8%B3-%D9%88%D8%B1%D8%A7%D8%AB%D8%A9-%D9%88%D8%AA%D8%B1%D8%A8%D9%8A%D8%A9-%D8%A7%D9%84%D8%AD%D9%8A%D9%88%D8%A

Course Description Form

1. Course Name:	
Design and Analysis of Experiments	
2. Course Code:	
DAEX327	
3. Semester / Year:	
First semester / Third	
4. Description Preparation Date:	
3-2-2025	
5. Available Attendance Forms:	
Attending	
6. Number of Credit Hours (Total) / Number of Units (Total)	
5 hours 3.5 unite	
7. Course Administrator's Name (Mention All, If More Than One Name)	
Name: Prof. Asaad yheia Ayied Email: asaad.yheia@uobasrah.edu.iq Teacher. Bashar Falih Zageer Email: bashar.zageer@uobasrah.edu.iq	
8. Course Objectives	
Course Objectives	Graduating capable studentson me: - Working in the field of designing agricultural experiments, they have theoretical and applied knowledge regarding the design subject. - Obtaining the skills required for the post-graduation plan (graduate studies). - Collecting, tabulating and summarizing data. - Conduct statistical tests. - Discussing and interpreting results and making decisions. - Using modern methods and statistical programs that contribute to the design of agricultural experiments and that are reflected in its various production characteristics

9. Teaching and Learning Strategies

Strategy	1-Enabling students to think and analyze topics related to the intellectual framework of the design and analysis of experiments subject. 2- Enabling students to think and analyze topics related to ways to design successful experiments related to increasing productivity. 3- The design and analysis of experiments is a branch of statistics that is interested in applying the statistical method, and is an important topic in the research planning of managing and conducting a particular experiment to obtain data that can be analyzed and reach a specific conclusion through which it includes collecting, arranging and reducing data and then conducting certain statistical tests used to make decisions regarding the objectives that the experiment is designed to study.
----------	--

10. Course Structure

Week	Hours	Required learning	Unit or Subject Name	Learning Method	Evaluation Method
1	5	Introducing students to general	Introduction, Central Tendency Measurements,	Teaching method	the exams Daily and monthly
2	5	Introducing students to some general	Mean properties, Median, Mode	Lectures Theoretical and practical	the exams Daily and monthly
3	5	Introducing students to some	Dispersion Measurements Range, Variance,	Lectures Theoretical and practical	the exams Daily and monthly
4	5	Introducing students to how to	Coefficient of Variation, Standardized	Lectures Theoretical and practical	the exams Daily and monthly
5	5	Introducing students to the basic	Analysis of Variance, Linear Model	Lectures Theoretical and practical	the exams Daily and monthly
6	5	Introducing students to the most	Analysis of Variance table,	Lectures Theoretical and practical	the exams Daily and monthly

7	5	Explain and explain the completely	Complete Randomized Design (CRD)	Lectures Theoretical and practical	the exams Daily and monthly
8	5	A detailed explanation of how to	Various examples of completely randomized design	Lectures Theoretical and practical	the exams Daily and monthly
9	5	Introducing the importance of	Least Significant Difference (LSD)	Lectures Theoretical and practical	the exams Daily and monthly
10	5	Explain and clarify the variance and	Variance of the difference between two	Lectures Theoretical and practical	the exams Daily and monthly
11	5	Introduction to Duncan tests and how	Duncan's Multiple Range, Lest Significant Range	Lectures Theoretical and practical	the exams Daily and monthly
12	5	A detailed explanation of the	Randomized Complete Block Design (RCBD)	Lectures Theoretical and practical	the exams Daily and monthly
13	5	Introducing students to methods for	Missing Value, Relative Efficiency	Lectures Theoretical and practical	the exams Daily and monthly
14	5	Reminding students of the topics that have been studied and	General review	Lectures Theoretical and practical + Display methods + Dialogue and	the exams Daily and monthly And final reports
15			Exame		

11. Course Evaluation

- Daily exams with multiple-choice questions that require scientific skills.
- Daily exams with scientific questions.
- Participation grades for competition questions for academic subjects.
- Marking homework and reports
- Grades for the student's activity during the lecture and the extent of his commitment to regular attendance and absence.

12. Learning and Teaching Sources

Required Textbooks (Curricular Books, If Any)	Khashi Mahmoud Al-Rawi and Abdul Aziz Muhammad Khalaf Allah (1980). Design and analysis of agricultural experiments - Ministry of Higher Education and Scientific Research -
Main References (Sources)	1- Ahmed Obada Sarhan (1983). Design and analysis of experiments - University Books House - Cairo - Arab Republic of Egypt. 2- Naeem Thani Al-Muhammad, Khashi Mahmoud Al-Rawi, Moayad Ahmed Younis and Walid Khudair Al-Marani (1989). Principles of Statistics - Dar Al-Kutub Foundation for Printing and Publishing - University of Mosul - Iraq. 3- Mohamed Abdel Moneim's wealth (2004). Design and analysis of experiments - Anglo-Egyptian Library - Arab Republic of Egypt.
Recommended Books and References (Scientific Journals, Reports...)	Various classification research and university theses domestic in Experimental design and statistical analysis

Course Description Form

1. Course Name:
Hatching and Hatches Management
2. Course Code:
HAMA313
3. Semester / Year:
First semester Third
4. Description Preparation Date:
1-4-2025
5. Available Attendance Forms:
Attending
6. Number of Credit Hours (Total) / Number of Units (Total)
5 hours 3.5 unit
7. Course Administrator's Name (Mention All, If More Than One Name)
Name: Assist. Prof. Alfred solaka karomy Email: alfred.karomy@uobasrah.edu.iq
8. Course Objectives

Course Objectives	Graduating students capable of: - Working in the field of hatchery management and related conditions - Introducing the student to the successful management curriculum for hatchery projects - Helping students understand the syllabuses and vocabulary of the lesson and curriculum for the subject of hatching and hatchery management. - Introducing the modern scientific foundations of hatchery management Practical practice of the most important hatchery projects.
-------------------	--

9. Teaching and Learning Strategies

Strategy	1 -Enabling students to think and analyze topics related to the intellectual framework of the subject of hatching and hatchery management 2-Enabling students to think and analyze topics related to measuring productivity. 3-Enabling students to think and analyze how to provide appropriate conditions of temperature, humidity, and ventilation 4- Enabling students to think and analyze to learn about hatching projects
----------	--

10. Course Structure

Week	Hours	Required Learning	Unit or Subject Name	Learning Method	Evaluation Method
1	5	Introducing students to general information about	History of hatching	Teaching method	the exams Daily and monthly

2	5	Introducing students to the female	male reproductive system	Lectures Theoretical and practical	the exams Daily and monthly
3	5	Introducing students to the male reproductive	The female reproductive system	Lectures Theoretical and practical	the exams Daily and monthly
4	5	Introducing students to ways to collect and	hatching eggs treatment	Lectures Theoretical and practical	the exams Daily and monthly
5	5	Introducing students to the appropriate	Hatching requirements	Lectures Theoretical and practical	the exams Daily and monthly
6	5	Introducing students to the development of the	stages of embryonic development	Lectures Theoretical and practical	the exams Daily and monthly
7	5	Introducing students to ways to monitor eggs	Vital monitoring during hatching	Lectures Theoretical and practical	the exams Daily and monthly
8	5	A detailed explanation of hatcheries and	Hatching methods and types of hatchers	Lectures Theoretical and practical	the exams Daily and monthly
9	5	Introducing hatcheries and methods of	hatcheries	Lectures Theoretical and practical	the exams Daily and monthly
10	5	Explaining and clarifying the nutritional	Nutrition and its relationship to spawning	Lectures Theoretical and practical	the exams Daily and monthly
11	5	Introducing the quality of good chicks suitable for	Identifying and evaluating the quality of	Lectures Theoretical and practical	the exams Daily and monthly
12	5	Introducing modern methods of managing	Intelligent management of hatcheries	Lectures Theoretical and practical	the exams Daily and monthly
13	5	Introducing students to the basic methods of	Hatchery management	Lectures Theoretical and practical	the exams Daily and monthly

14	5	Introducing students to how to deal with bird droppings and benefit from them as	Elimination of waste	Lectures Theoretical and practical	the exams Daily and monthly
15		Exame			

11. Course Evaluation

- Daily exams with multiple-choice questions that require scientific skills.
- Daily exams with scientific questions.
- Participation grades for competition questions for academic subjects.
- Marking homework and reports
- - Grades for the student's activity during the lecture and the extent of his commitment to regular attendance and absence.

12. Learning and Teaching Sources

Required Textbooks (Curricular Books, If Any)	Methodical books: Hatching and hatchery management - Dr. Saad Abdel Hussein
Main References (Sources)	Hatching in poultry – Dr. Tariq Amin Obaid - 2010
Recommended Books and References (Scientific Journals, Reports, ...)	Magazines, periodicals, websites, etc
Electronic References, Websites	https://www.noor-book.com/book/review/926609

Course Description Form

1. Course Name:	
Animal Physiology	
2. Course Code:	
ANPH312	
3. Semester / Year:	
First semester / Third	
4. Description Preparation Date:	
13-2-2025	
5. Available Attendance Forms:	
Attending	
6. Number of Credit Hours (Total) / Number of Units (Total)	
5 hours per week 3.5 unit	
7. Course Administrator's Name (Mention All, If More Than One Name)	
Name: Prof. Waleed Yosief Kassim Email: waleed.yosief@uobasrah.edu.iq	
8. Course Objectives	
Course Objectives	Graduating capable studentson me: - Work in the field of organ functions so that students have theoretical and applied knowledge regarding the functions of the animal body and their relationship to animal production. Obtaining the skills required for the post-graduation plan (graduate studies). - Applying for external tests by local/regional/international bodies. - Thinking and analysis skills that enable one to arrive at knowledge of how to deal with agricultural animals in Faslja. - Providing students with work skills in the scientific and research fields related to animal

9. Teaching and Learning Strategies

Strategy	1-Enabling students to think and analyze topics related to the intellectual framework of the animal physiology subject. 2-Enabling students to think and analyze topics related to measuring productivity. 3- Enabling students to think and analyze how to provide the necessary information in dealing with agricultural animals physiologically, and to know the optimal health efficiency to obtain the maximum production capacity of the animal.
----------	---

10. Course Structure

- Obtaining the skills required for a post-graduation plan(Studiesupper).
- Applying for external examinations by local / regional / international bodies.

Thinking and analysis skills that enable arriving at knowledgeHow to establish, prepare and supervise poultry farming projects.

- Providing students with work skills in theFieldsScientific, research and studypoultryAnd its relationship to wealthanimal.

Week	Hours	Required learning outcomes	Unit or Subject Name	Learning Method	Evaluation Method
1	5	Introducing students to general	A general introduc	Teaching method	the exams Daily and monthly

2	5	Introducing students to the nature	Animal cell structure	Lectures Theoretical and practical + Display methods	the exams Daily and monthly
3	5	Explanation of the nerve cell,	. The nerve cell	Lectures Theoretical and practical + Display methods	the exams Daily and monthly
4	5	Explaining the component	the nervous system	Lectures Theoretical and practical + Display methods	the exams Daily and monthly
5	5	Introducing students to the physiological function of the	the digestive system	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily
6	5	Introducing students to how animals	metabolism	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final
7	5	Introducing students to the general physiology	Blood	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final
8	5	A detailed explanation of blood circulation,	blood circulation	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final
9	5	Introducing students to the parts of the excretory	The excretory system	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports

10	5	Explanation and clarification of the respiratory system	The respiratory system	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports
11	5	The environmental feelings and	the environmental behavior	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports
13	5	Introducing students to the endocrine system	Endocrine glands	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports
14	5	A detailed explanation of the male and female reproductive systems	The reproductive system	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports
15	5	Exam			daily

11. Course Evaluation

- Daily exams with multiple-choice questions that require scientific skills.
- Daily exams with scientific questions.
- Participation grades for competition questions for academic subjects.
- Marking homework and reports
- - Grades for the student's activity during the lecture and the extent of his commitment to regular attendance and absence.

12. Learning and Teaching Sources

Required Textbooks (Curricular Books, If Any)	Animal Physiology - Dhia Hassan Al-Hassani and Sadiq Muhammad Amin Al-Hiti - 1990

8. Course Objectives

Course Objectives	Graduating capable students on me: • Working in the field of manufacturing poultry products and having theoretical and applied knowledge regarding the technology of poultry products. Obtaining the skills required for the post-graduation plan (graduate studies). • Obtaining the skills required for a post-graduation plan (Studies upper). • Applying for external examinations by local / regional / international bodies. • Thinking and analysis skills that enable arriving at knowledge How to establish, prepare and supervise poultry farming projects. • Providing students with work skills in the Fields Scientific, research and study poultry And its relationship to wealth animal.
9. Teaching and Learning Strategies	
Strategy	Enabling students to think and analyze topics related to the intellectual framework of the subject Poultry products technology. Enabling students to think and analyze topics related to measuring productivity. Enabling students to think and analyze how to provide environmental conditions that affect poultry birds and their relationship to their production and health status. Enabling students to think and analyze to identify the best prevailing poultry projects and their relationship to animal production.
10. Course Structure	

Week	Hours	Required learning	Unit or Subject Name	Learning Method	Evaluation Method
1	5	Introducing students to general	General introduction to Poultry products	Teaching method	the exams Daily and monthly
2	5	Introducing students to the components of	Hybrid breeds of laying hens.	Lectures Theoretical and practical	the exams Daily and monthly
3	5	Explain and clarify the environmental	Environmental factors that affect poultry	Lectures Theoretical and practical	the exams Daily and monthly
4	5	Introducing students to Egg production	Egg production	Lectures Theoretical and practical	the exams Daily and monthly
5	5	Introducing students to all the requirements	Qualitative measurements of eggs	Lectures Theoretical and practical	the exams Daily and monthly
6	5	Introducing students to Management	Management and care of laying hens.	Lectures Theoretical and practical	the exams Daily and monthly
7	5	Explaining and clarifying the requirements	Chemical and nutritional properties of	Lectures Theoretical and practical	the exams Daily and monthly
8	5	A detailed explanation Processes for	Processes for preparing poultry meat for	Lectures Theoretical and practical	the exams Daily and monthly
9	5	Introducing the importance of preparing poultry meat for	Processes for preparing poultry meat for consumption 2	Lectures Theoretical and practical + Display methods	the exams Daily and monthly And final
10	5	Explaining and clarifying the Quality of poultry meat and methods	Quality of poultry meat and methods of	Lectures Theoretical and practical + Display methods	the exams Daily and monthly And final
11	5	Introducing the characteristics and Storing	Storing poultry meat.	Lectures Theoretical and practical	the exams Daily and monthly

12	5	A detailed explanation of bird	Poultry slaughterhouse management.	Lectures Theoretical and practical	the exams Daily and monthly
13	5	Introducing students to Microbiology of	Microbiology of poultry meat	Lectures Theoretical and practical	the exams Daily and monthly
14	5	Introducing students to how to deal with bird	Poultry droppings and offal.	Lectures Theoretical and practical	the exams Daily and monthly
15		Exame			

11. Course Evaluation

- Daily exams with multiple-choice questions that require scientific skills.
- Daily exams with scientific questions.
- Participation grades for competition questions for academic subjects.
- Marking homework and reports
- - Grades for the student's activity during the lecture and the extent of his commitment to regular attendance and absence.

7. Course Administrator's Name (Mention All, If More Than One Name)
Name: Prof. Hanaa Ali Jabar Al-Galbi Email: hanaa.jabar@uobasrah.edu.iq
8. Course Objectives

Course Objectives	Graduating students are capable with: • Working in the feeds and feeding of animals. They have theoretical and applied knowledge regarding the feeds and nutrition and management. • Obtaining the skills required for a post-graduation plan (postgraduates). • Applying for external examinations by local / regional / international bodies. • Thinking and analysis skills that enable arriving at knowledge. How to establish, prepare and supervise in animal nutrition and farming projects. • Providing students with work skills in the Fields Scientific, research and study feeds and feeding and its relationship to animal performance.				
9. Teaching and Learning Strategies					
Strategy	Enabling students to think and analyse topics related to the intellectual framework of the subject administration and animal nutrition. Enabling students to think and analyse topics related to measuring productivity. Enabling students to think and analyse how to provide environmental conditions that affect animal feed and their relationship to their production and health status. Enabling students to think and analyse to identify the best prevailing animal projects and their relationship to animal production.				
10. Course Structure					
Week	Hours	Required learning outcomes	Unit or Subject Name	Learning Method	Evaluation Method

1	5	Cassification of feedstuffs	• Definitions • Rationale for classifying feedstuffs • Why classify feedstuffs Classifications with	Teaching method	the exams Daily and monthly And final reports
2	5	Water content in feeds	• Determining dry matter (DM) content of feeds • Estimation of feed intake of livestock basing on DM • Different methods of expressing nutrient composition	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily
3	5	Characteristics of common feedstuffs	• Cereal grains and their by-products • Legume grains and their by-products • Pastures • Roots and tubers	Lectures Theoretical and practical + Display methods + Dialogue and	the exams Daily and monthly And final reports daily
4	5	Antinutritional or Antiequality factors	• Definitions • Different antinutritional factors (ANF) • Effects of ANF on	Lectures Theoretical and practical + Display methods	the exams Daily and monthly And final reports
5	5	Nutrient requirements and Feeding standards	• Definitions • Safety Factor (SF) • Estimation of Nutrient requirements by Livestock	Lectures Theoretical and practical + Display methods	the exams Daily and monthly And final reports
6	5	Forage quality and factors affecting it	• Definitions • Forage quality factors • Voluntary intake (VI) Practical (field) work	Lectures Theoretical and practical + Display methods	the exams Daily and monthly And final reports

7	5	Feed preparation and processing	• Definitions • Reasons for processing feeds • Grain processing methods	Lectures Theoretical and practical + Display methods	the exams Daily and monthly And final reports
8, 9, 10, 11	5	Ration formulation and Feed mixing	• Basic information needed before embarking on ration formulation • Balancing rations by Hands • Pearson's square method • Double Pearson's square method • Algebraic method (simultaneous equations) • Slack method • Illustrating examples (calculations) • Computer aided	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily

9	5	Forage conservation	• Definitions • Why conserve forage • Ways of conservation • Silage • Basic principles of making hay • Silage microbiology • Objective of making silage • Factors affecting the ensiling process	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily
10		Forage conservation	•		
11	5	Feed budgeting	• Definitions • Approaches of feed budgeting	Lectures Theoretical and practical	the exams Daily and monthly
12	5	2 Water content in feeds	• Determining dry matter (DM) content of feeds	Lectures Theoretical and practical	the exams Daily and monthly
13	5	3. Characteristics of common	• Cereal grains and their by-products • Legume grains and	Lectures Theoretical and practical	the exams Daily and monthly
14	5	4. Antinutritional or	• Definitions • Different antinutritional factors	Lectures Theoretical and practical	the exams Daily and monthly
15	5	5. Nutrient requirements and Feeding standards	• Definitions • Safety Factor (SF) • Estimation of Nutrient requirements by Livestock	Lectures Theoretical and practical + Display methods	the exams Daily and monthly And final reports
11. Course Evaluation					

- Daily exams with multiple-choice questions that require scientific skills.
- Daily exams with scientific questions.
- Participation grades for competition questions for academic subjects.
- Marking homework and reports
- - Grades for the student's activity during the lecture and the extent of his commitment to regular attendance and absence.

Course Objectives	Graduating students are capable with: - Working in animals nutrition. They have theoretical and applied knowledge regarding the feeds and nutrition and management. - Obtaining the skills required for a post-graduation plan (postgraduates). - Applying for external examinations by local / regional / international bodies. - Thinking and analysis skills that enable arriving at knowledge. How to establish, prepare and supervise in animal nutrition and farming projects. - Providing students with work skills in the Fields Scientific, research and study feeds and feeding and its relationship to animal performance.

9. Teaching and Learning Strategies

Strategy	Enabling students to think and analyse topics related to the intellectual framework of the subject administration and animal nutrition. Enabling students to think and analyse topics related to measuring productivity. Enabling students to think and analyse how to provide environmental conditions that affect animal feed and their relationship to their production and health status. Enabling students to think and analyse to identify the best prevailing animal projects and their relationship to animal production.
----------	---

10. Course Structure

Week	Hours	Required learning	Unit or Subject Name	Learning Method	Evaluation Method
1	5	General roles in nutrition	• Definitions • Animal and their feeds • Comparison between animal body and plants • Methods used to measure the nutritional content of an animal's body • Dry, organic and inorganic matter • Water and its role in the body	Teaching method	the exams Daily and monthly And final reports daily
2	5	Digestion in different animals	• Anatomy of the digestive system of agricultural animals • An idea about the types of digestion • Mechanical digestion • Microbial digestion • Enzymatic digestion	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily

3	5	Digestive system functions	• Oral function and saliva • The function of the rumen and its various components • Function of the gastrointestinal tract • Function of the liver, bile and spleen	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily
4	5	Factors affecting digestion	• Type of feed • Availability of water • Type of animal • Administrative factors	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily
5	5	Rumination	• Type of feed • Digestive system environment (especially the rumen) • Nutrition and management	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily
6	5	Eructation	• identification • nutrition • Digestion • Environmental factors	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily
7	5	Nutrients: carbohydrates	• Definition and classification • Digestion • Absorption • the metabolism	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily
8	5	Nutrients Fats	• Definition and classification • Digestion • Absorption • the acting • Fatty acids • The effect of using fats in animal nutrition	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily

9	5	Nutrients Protein	• Definition and classification • Protein synthesis • Essential and non-essential amino acids	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily
10	5	Nutrients Protein	• Nucleic acids • Non-protein nitrogenous compounds (NPN). • Physical and chemical treatments to improve the nutritional value of protein • Amino acids specific for production	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily
11	5	Nutrients Protein	• Protein digestion and absorption • Representation of proteins • Biological value of protein	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily
12	5	Nutrients Vitamins	• Definition and classification • Chemical composition • Sources of vitamins • General functions of vitamins • Deficiency symptoms	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily
13	5	Nutrients Minerals	• Definition and classification • General functions of metals • Needs • Deficiency symptoms	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily
14	5	The impact of nutrition on animal health and production	• Nutritional deficiency diseases • Digestive system disorders • Bloat • Acidity • Ketosis	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily
15			Exame

Name: Prof.Dr. Khalid Chillab Kridie Email: khalid.chillab@uobasrah.edu.iq	
8. Course Objectives	
Course Objectives	- The student learns about the most important organs of the bird's body . - The student learns about the most important functions of the body systems of domestic birds. - The student learns about the most important differences between the body systems of birds and mammals. - The student learns about the most important factors affecting the functions of the various organs of the bird's body.

9. Teaching and Learning Strategies

Strategy	Enabling students to think and analyze topics related to the intellectual framework of the subject administration of poultry physiology. Enabling students to think and analyze topics related to measuring productivity. Enabling students to think and analyze how to provide environmental conditions that affect poultry birds and their relationship to their production and health status. Enabling students to think and analyze to identify the best prevailing poultry projects and their relationship to animal production.
----------	---

10. Course Structure

Week	Hours	Required learning	Unit or Subject Name	Learning Method	Evaluation Method
1	5	The respiratory system	The respiratory system	Teaching method	the exams Daily and monthly
2	5	The digestive system	The digestive system	Lectures Theoretical and practical	the exams Daily and monthly
3	5	Digestive, metabolism and	Digestive, metabolism and absorption	Lectures Theoretical and practical	the exams Daily and monthly
4	5	Blood physiology and its	Blood physiology and its importance	Lectures Theoretical and practical	the exams Daily and monthly
5	5	Description of blood cells and their	Description of blood cells and their functions	Lectures Theoretical and practical	the exams Daily and monthly
6	5	The male reproductive system	The male reproductive system	Lectures Theoretical and practical	the exams Daily and monthly
7	5	Differentiation between male	Differentiation between male reproductive	Lectures Theoretical and practical	the exams Daily and monthly

8	5	Chemical composition of bird semen	Chemical composition of bird semen	Lectures Theoretical and practical	the exams Daily and monthly
9	5	The female reproductive system	The female reproductive system	Lectures Theoretical and practical	the exams Daily and monthly
10	5	Hormones related to egg production	Hormones related to egg production	Lectures Theoretical and practical	the exams Daily and monthly
11	5	Endocrine – the first part	Endocrine – the first part	Lectures Theoretical and practical	the exams Daily and monthly
12	5	Endocrine - the second part	Endocrine - the second part	Lectures Theoretical and practical	the exams Daily and monthly
13	5	Endocrine – the third part	Endocrine – the third part	Lectures Theoretical and practical	the exams Daily and monthly
14	5	The urinary system	The urinary system	Lectures Theoretical and practical	the exams Daily and monthly

11. Course Evaluation

- Daily exams with multiple-choice questions that require scientific skills.
- Daily exams with scientific questions.
- Participation grades for competition questions for academic subjects.
- Marking homework and reports
- - Grades for the student's activity during the lecture and the extent of his commitment to regular attendance and absence.

12. Learning and Teaching Sources

Required Textbooks (Curricular Books, If Any)	Al-Hyssani, D. (2000). POULTRY PHYSIOLOGY. BOOK
---	---

Recommended Books and References (Scientific Journals, Reports...)	Various classification research and university theses domestic birds

Course Description Form

1. Course Name:
poultry physiology/ Practical
2. Course Code:
POPH317
3. Semester / Year:
Second semester / Third
4. Description Preparation Date:
26-2-2025
5. Available Attendance Forms:
Attending
6. Number of Credit Hours (Total) / Number of Units (Total)
6 hours per week 3.5 Unit
7. Course Administrator's Name (Mention All, If More Than One Name)
Name: Assist. teach. Tarek Ibrahim Majed Email: tarik.majed@uobasrah.edu.iq
8. Course Objectives

Course Objectives	Graduating capable students on me: • Understand the nutritional needs of different types To understand the anatomy and physiology of the poultry digestive system and how it affects the digestion and absorption of nutrients. • To learn about the nutrient requirements of different poultry species, breeds, and production stages, and how to formulate balanced and cost-effective diets. • To evaluate the nutritional quality, safety, and availability of various feedstuffs and feed additives for poultry, and how to use them efficiently and responsibly. • To explore the interactions between nutrition and other factors such as genetics, environment, health, welfare, and product quality, and how to optimize them for sustainable poultry production.
-------------------	--

9. Teaching and Learning Strategies

Strategy	1. To investigate the effects of different environmental factors, such as temperature, humidity, lighting, and stress, on the physiological responses and welfare of poultry 2. To examine the mechanisms and regulation of various physiological processes, such as growth, reproduction, immunity, and metabolism, in poultry, and how they are influenced by genetic and nutritional factors. 3. To develop and apply new technologies and methods, such as molecular biology, biotechnology, and bioinformatics, to enhance the understanding and improvement of poultry physiology. 4. To integrate the knowledge of poultry physiology with other disciplines, such as poultry nutrition, health, behavior, and

Course Description Form

1. Course Name:	
Poultry Pathology/ practical	
2. Course Code:	
POPA418	
3. Semester / Year:	
Second semester / Fourth	
4. Description Preparation Date:	
16-3-2025	
5. Available Attendance Forms:	
Attending	
6. Number of Credit Hours (Total) / Number of Units (Total)	
5 hours per week 3.5 unit	
7. Course Administrator's Name (Mention All, If More Than One Name)	
Name: Assist. Prof.huda falih saad Email: huda.falih@uobasrah.edu.iq	
8. Course Objectives	
Course Objectives	Graduate students who are able to: - Working in the fields of poultry breeding and production and poultry health and safety as a veterinary supervisor, the owners of the fields have theoretical and applied knowledge regarding common poultry diseases and how to treat them. Obtaining the skills required for the post-graduate (postgraduate) plan. - The application for external tests by local, regional, or international bodies. - Knowledge of how to prepare poultry fields with excellent

9. Teaching and Learning Strategies

Strategy

1. Enable students to think about and analyze topics related to the intellectual framework of poultry diseases.
2. enable students to think about and analyze topics related to the formation and preservation of vaccines and methods of giving them.
3. enabling students to think and analyze how to provide environmental conditions that affect the health of poultry birds and their relationship to the production situation.
- 4: Enable students to think and analyze to identify the symptoms of diseases and how to prescribe the appropriate treatment for them, whether the disease is nutritional or viral.

10. Course Structure

Week	Hours	Required learning	Unit or Subject Name	Learning Method	Evaluation Method
1	6	Introduce students to general information about diseases affecting	Introduction to Common Poultry Diseases	practical +Display methods +Dialogue and discussion	"The tests include daily and monthly assessments, as well as final reports."
2	6	Introducing students to the common diseases that affect chickens, whether broilers or laying hens	Diseases that affect broilers or laying hens .	Approach to Studying: Practical instruction Showcase procedures +A conversation and discussion	"The tests include daily and monthly assessments, as well as final reports."

3	6	Explain and clarify the most critical symptoms of food deficiency diseases.	"Diseases resulting from malnutrition."	Check out the circumstances of growing chickens by visiting the poultry field. conversation and debate	"The tests include daily and monthly assessments, as well as final reports."
4	6	Introducing students to the most critical symptoms of vitamin and mineral deficiency in detail	"Insufficient intake of essential vitamins and minerals can lead to several health issues."	View illustrations of malnourished hens Display operations +Discourse and dialogue	"The tests include daily and monthly assessments, as well as final reports."
5	6	Introducing students to the equipment used in conducting vaccination and vaccination	"Equipment and Supplies for Vaccination"	Performing a vitamin deficiency screening on a chicken as part of my Class	"The tests include daily and monthly assessments, as well as final reports."
6	6	Introduce students to the types of vaccines used according to the age and type of bird and the production	Types of vaccines	Possibility to gain entry to practical laboratories and microbiology + Methods for displaying +Conversation and debate +Dialogue and	"The tests include daily and monthly assessments, as well as final reports."

7	6	Introducing students to how to culture bacterial colonies in different environments	Bacterial colonies	Possibility to gain entry to practical laboratories and microbiology + Methods for displaying +Conversation and debate and	"The tests include daily and monthly assessments, as well as final reports."
8	6	A detailed explanation of the most critical vital organs that	Some of the body's most vulnerable systems to disease are the digestive, respiratory, and	Diseased bird anatomy and presentation techniques +Dialogue and	"The tests include daily and monthly assessments, as well as final reports."
9	6	Definition of medicines used in poultry wards and fields	"Medicines and therapeutics" refer to drugs and treatments that are used to cure or alleviate medical conditions. It encompasses a	practical +Display methods +Dialogue and discussion	"The tests include daily and monthly assessments, as well as final reports."
10	6	Explanation and clarification of infectious and common diseases between humans and birds	Common diseases between humans and poultry (fungal diseases and fungal poisoning)	practical +Display methods +Dialogue and discussion	"The tests include daily and monthly assessments, as well as final reports."

11	6	Definition of the most important diseases that are genetically transmitted from mothers to new offspring	Genetic diseases	practical +Display methods +Dialogue and discussion	"The tests include daily and monthly assessments, as well as final reports."
12	6	Detailed explanation of heat stress disease and how to take measures and measures to	Heat stress and breeding problems	practical +Display methods +Dialogue and discussion	"The tests include daily and monthly assessments, as well as final reports."
13	6	Definition of diseases that affect chicks during embryonic development, their causes.	Diseases affecting the hatching rate and diseases of the reproductive system	practical +Display methods +Dialogue and discussion	"The tests include daily and monthly assessments, as well as final reports."

14	6	Introduce students to how to deal with dying birds, how to disinfect and sterilize fields and halls dedicated to breeding bird droppings, and how to use them as one of the secondary resources for	Sterilization of poultry halls is essential, and ways to do it.	Showcase procedures conversation and debate Stop by the Animal Production Department's poultry halls for some useful information.	"The tests include daily and monthly assessments, as well as final reports."
15	6	Definition and explanation of immunity and the immune system and the most important tests performed by a breeder or veterinarian to detect the level of immunity to a break	Immunity, methods of disease resistance, and types of immunity + Exame	Check out the immunological tests performed in veterinary clinics.	"The tests include daily and monthly assessments, as well as final reports."

11. Course Evaluation

- Daily exams with multiple-choice questions that require scientific skills.
 - Daily exams with scientific questions.
 - Carrying out activities within the laboratory
- participation scores for competition questions for study subjects.
 - Set grades for homework assignments and reports
- grades for the student's activity during the lecture and the extent of his commitment to attendance and non-absence.

12. Learning and Teaching Sources

Required Textbooks (Curricular Books, If Any)	The book of poultry diseases / Dr. Sami Allam ninth edition-The Book of poultry diseases prepared and written by Dr. Mohamed Ali Al-Emadi and Dr. Mohamed Fadel / Egypt Cairo
Main References (Sources)	Hazem al-Daraji (2012). Poultry disease serology Noor press.Baghdad-Naji, Saad Abdul Hussein (2017) Commercial production of poultry meat. Noor press.

Course Description Form

1. Course Name:	
Molecular Biology	
2. Course Code:	
MOBI414	
3. Semester / Year:	
Second semester / Fourth	
4. Description Preparation Date:	
3/2/2025	
5. Available Attendance Forms:	
Attending	
6. Number of Credit Hours (Total) / Number of Units (Total)	
5 hours per week 3.5 unit	
7. Course Administrator's Name (Mention All, If More Than One Name)	
Name: Assist. Prof. Sajida Abdulsemed Mejeed Email: Sajida.mejeed@uobasrah.edu.iq	
8. Course Objectives	
Course Objectives	The course aims to identify the structure of organisms at the molecular level and the synthesis of proteins and also to know the effect of genetic changes that occur on the occurrence of mutations. It also highlights the nuclear structure and the structure of DNA and RNA nucleic acids and their role in the process of protein synthesis.

9. Teaching and Learning Strategies

Strategy	1-The course focuses on studying of biology at the molecular level 2-Understanding relationship between cellular systems in terms of nucleic acids and their relationship to protein synthesis in organisms. 3 Understanding the mechanisms of genetic mutations, their causes and their types. 4-Studying correcting of errors in nucleic acids and the most important enzymes involved in the processes of replication, transcription and translation. 5-Identification of nucleoproteins, histones and chromosomal structures.
----------	--

10. Course Structure

Week	Hours	Required learning outcomes	Unit or Subject Name	Learning Method	Evaluation Method
1	5	Introduction to genetic, its branches, applications and cell	General introduction to the genetic science.	Teaching method	the exams Daily and monthly
2	5	Eukaryotes and Prokaryotes organisms and ..	Experiments of the genetic material discovering in	Lectures Theoretical and practical	the exams Daily and monthly
3	5	DNA structure in eukaryotes and prokaryotes	Wateson and Crick description of DNA structure.	Lectures Theoretical and practical	the exams Daily and monthly
4	5	RNA structure, types and functions in transcription and	RNA structure.	Lectures Theoretical and practical	the exams Daily and monthly
5	5	The process of DNA replication in eukaryotes and	DNA Replication	Lectures Theoretical and practical	the exams Daily and monthly

6	5	The process of transcription and involved enzymes..	RNA structure	Lectures Theoretical and practical	the exams Daily and monthly
7	5	The process of translation and protein synthesis in	The protein synthesis	Lectures Theoretical and practical	the exams Daily and monthly
8	5	Genetic mutations, their types and causes.	The genetic changes in genetic material	Lectures Theoretical and practical	the exams Daily and monthly
9	5	The process of repairing errors in DNA replication.	DNA repair.	Lectures Theoretical and practical	the exams Daily and monthly
10	5	Nuclear chromatin and the structure of histones and	The nucleosome structure	Lectures Theoretical and practical	the exams Daily and monthly
11	5	Types of histones and their role in eukaryotes and	The rules of histones in organisms	Lectures Theoretical and practical	the exams Daily and monthly
12	5	Chromosomes and their structure.	The chromosomes and its structures.	Lectures Theoretical and practical	the exams Daily and monthly
13	5	Centromeres and Telomeres.	The centromeres and its structures.	Lectures Theoretical and practical	the exams Daily and monthly
14	5	The most important techniques of molecular biology.	The advances in Molecular biology science	Lectures Theoretical and practical	the exams Daily and monthly
15		Exame			

11. Course Evaluation

- Daily exams with multiple-choice questions that require scientific skills.
- Daily exams with scientific questions.
- Participation grades for competition questions for academic subjects.
- Marking homework and reports
- - Grades for the student's activity during the lecture and the extent of his commitment to regular attendance and absence.

12. Learning and Teaching Sources	
Required Textbooks (Curricular Books, If Any)	Principles of Genetics.1996.Robert H. Tamarin. Boston University
Main References (Sources)	Principles of Molecular Genetics.2012.Mohammed B.AL-Shuheeb. Ministry of Higher Education. Al-Qasim University .College of Biotechnology

Course Description Form

1. Course Name:
Buffalo production
2. Course Code:
BUPR425
3. Semester / Year:
Second semester / Fourth
4. Description Preparation Date:
2-3-2025
5. Available Attendance Forms:
Attending
6. Number of Credit Hours (Total)/Number of Units (Total)
2 hours per week for 14 weeks. 2 units
7. Course Administrator's Name (Mention All, If More Than One Name)
Name: Assist. Prof Jalal Okali Usur Sawad Alali Email: jalal.usur@uobasrah.edu.iq
8. Course Objectives

Course Objectives	Graduating capable students on me: - Understanding the obstacles in buffalo management in Iraq and ways to improve production - Understanding the physiology of milk secretion and the factors affecting milk production - Studying the characteristics of buffalo breeds and their spread. - Identifying reproduction in buffalo, pregnancy and childbirth - Introducing the student to buffalo and its production in Iraq and the world in a way that can be understood.
-------------------	---

9. Teaching and Learning Strategies

Strategy	1- Enabling students to think and analyze topics related to the intellectual framework of the subject of buffalo production 2- Enabling students to think and analyze topics related to measuring productivity. 3- Enabling students to think and analyze how to provide environmental conditions that affect buffalo and their relationship to their production and health status.
----------	--

10. Course Structure

Week	Hours	Required learning outcomes	Unit or Subject Name	Learning Method	Evaluation Method
1	5	An introduction to the buffalo and its position in the animal kingdom	A general introduction to buffalo	Teaching method	the exams Daily and monthly

2	5	Learn about all buffalo breeds in the world and the	Buffalo breeds in the world	Lectures Theoretical and practical	the exams Daily and monthly
3	5	Identify the most important general characteristics of	General characteristics of buffalo.	Lectures Theoretical and practical	the exams Daily and monthly
4	5	Identify the diets provided to buffaloes, their	Buffalo feeding	Lectures Theoretical and practical + Display	the exams Daily and monthly And final
5	5	An idea about buffalo reproduction and the most important	Reproduction in buffalo	Lectures Theoretical and practical + Display	the exams Daily and monthly And final
6	5	Learn how to inseminate buffalo wheels, learn about	Insemination, pregnancy and parturition in	Lectures Theoretical and practical	the exams Daily and monthly
7	5	Study the needs of buffalo breeding and how to care for calves	Raising and caring for buffalo calves	Lectures Theoretical and practical + Display methods	the exams Daily and monthly And final reports
8	5	Knowing the level of students in previous lectures	the first exam	Lectures Theoretical and practical + Display	the exams Daily and monthly And final
9	5	Know the differences between the rumen of buffalo and	Differences found in buffalo tripe	Lectures Theoretical and practical + Display	the exams Daily and monthly And final
10	5	Identify the factors affecting milk production	About cows	Lectures Theoretical and practical	the exams Daily and monthly

11	5	Identify the components of buffalo milk and know the factors affecting it	Buffalo milk production and influencing factors	Lectures Theoretical and practical + Display methods +Dialogue and discussion	the exams Daily and monthly And final reports daily
12	5	Identify the types of meat as well as the carcass parts of buffalo	on him	Lectures Theoretical and practical + Display methods +Dialogue and	the exams Daily and monthly And final reports daily
13	5	Identify the most important procedures that must be taken into account in fattening buffalo calves	Components of buffalo milk and factors affecting it	Lectures Theoretical and practical + Display methods +Dialogue and discussion	the exams Daily and monthly And final reports daily
14	5	Learn about modern health methods in caring for and treating buffaloes	Meat production in buffalo and carcass recipes	Lectures Theoretical and practical + Display methods +Dialogue and discussion	the exams Daily and monthly And final reports daily
15		Exame			

11. Course Evaluation

- Daily exams with multiple-choice questions that require scientific skills.
- Daily exams with scientific questions.
- Participation grades for competition questions for academic subjects.
- Marking homework and reports
- - Grades for the student's activity during the lecture and the extent of his commitment to regular attendance and absence.

12. Learning and Teaching Sources

Required Textbooks (Curricular Books, If Any)	Raising and caring for buffalo/Dr. Adel Sayed Ahmed Al-Barbari 2007
Main References (Sources)	Livestock production/Dr. Natiq Hameed and Dr. Ashwaq Abd and Al-
Recommended Books and References (Scientific Journals, Reports...)	Your guide to raising cows and buffalo/Dr. Mustafa Fay 201

Course Description Form

1. Course Name	
Meat Production	
2. Course Code	
MPRO415	
3. Semester/Year	
First Semester/ Fourth	
Date of preparation of this description .4	
2-4-2025	
5. Available attendance forms	
Attending	
6. Number of credit hours (total) / number of units (total)	
5 hours per week.5 unit	
7. Course administrator's name (if more than one name is mentioned)	
Name: Assoc. Prof. Muntaha Yaqoub Youssef Email: @uobasrah.edu.iq muntaha.yousief	
8. Course Objectives	
Graduating students who are able to: - Work in the field of breeding and production Cattle Have theoretical and applied knowledge regarding the material management and production Meat cattle. Obtain the skills required for a post-graduate plan (postgraduate). - Submission of external exams by local/regional/international bodies. - Thinking and analysis skills that enable to reach knowledge of how to establish, prepare and supervise calf breeding projects . - Providing students with work skills in scientific and research fields and studying meat cattle and its relationship to livestock.	Course Objectives

9. Teaching and learning strategies

Enable students to think and analyze topics related to the intellectual framework of cow production Enable students to think and analyze topics related to productivity measurement. Enable students to think and analyze how to provide environmental conditions that affect livestock production and their relationship to their productive and health status. 4- Enabling students to think and analyze to identify the best prevailing livestock projects and their relationship to animal production.	Strategy
--	----------

10. Course Structure

Evaluation method	Learning method	Unit or subject name	Required Learning Outcomes	Hours	Week
auditions Daily & Monthly Final and	Lectures Theoretical and practical	General introduction to livestock production	Introduce students to general information about meat cattle.	5	1
auditions Daily & Monthly Final and	Lectures Theoretical and practical	Meat cattle breeds	Introduce students to the elements of meat production.		2
auditions Daily & Monthly Final and	Lectures Theoretical and practical	Environmental factors affecting meat production.	Explain and clarify the environmental factors affecting meat production.		3
auditions Daily & Monthly Final and	Lectures Theoretical and practical	dwelling	Introducing students to meat cow housing, types and features.		4
auditions Daily & Monthly Final and	Lectures Theoretical and practical	Livestock breeding supplies.	Introducing students to all the supplies used in raising livestock.		5
auditions Daily & Monthly Final and	Lectures Theoretical and practical	Management and care of meat production.	Introducing students to the requirements of meat breeding and production, its needs		6
auditions Daily & Monthly Final and	Lectures Theoretical and practical	Field operations in cattle	Explain and clarify field operations.		7

auditions Daily & Monthly Final and	Lectures Theoretical and practical	Slaughtering the animal and cutting the carcass	Accommodation of meat cattle		8
auditions Daily & Monthly Final and	Lectures Theoretical and practical	By-products in the meat industry	Growth and development of meat cattle		9
auditions Daily & Monthly Final and	Lectures Theoretical and practical	Diseases of meat cattle	Identification of diseases of meat cattle		10
auditions Daily & Monthly Final and	Lectures Theoretical and practical	Compensatory growth	Compensatory growth of meat cattle		11
auditions Daily & Monthly Final and	Lectures Theoretical and practical	The composition of diets for meat cattle	Feeding meat cows and forming diets		12
auditions Daily & Monthly Final and	Lectures Theoretical and practical	Calculation of reproductive competence	Reproductive efficiency of meat cows		13
auditions Daily & Monthly Final and	Lectures Theoretical and practical	Growth stimulants and their role in improving livestock	Growth stimulants and their role in improving livestock		14

11. Course Evaluation

Daily exams with multiple-choice questions that require scientific skills.

- Daily exams with scientific questions.
- Participation grades for competition questions for academic subjects.
- Grade homework and reports
- Grades of the student's activity during the lecture and the extent of his commitment to attendance and non-absence.

12. Learning and Teaching Resources

Abdul Majeed, Muhareb Abdul Hamid (1986). Production of meat animals. Basra	Required textbooks (methodology, if any)
Abdallah, Omar Yousry (2010) Production of meat animals Ain Shams University,	Key references (sources)
Abdullah, Omar Yousry & Anous Mohammad Reda (2007) Production of meat	Recommended supporting books and references (scientific journals, reports...)

Course Description Form

1. Course Name:
Meat sciences
2. Course Code:
MESC424
3. Semester / Year:
Second semester / Fourth
4. Description Preparation Date:
1-1-2025
5. Available Attendance Forms:
Attending
6. Number of Credit Hours (Total)/Number of Units (Total)
5 hours per week 3.5 unit
7. Course Administrator's Name (Mention All, If More Than One Name)
Name: Assist. Prof. ghaidda ali .makki Email: ghaidda.makki@uobasrah.edu.iq
8. Course Objectives

Course Objectives	Graduating capable students on me: Working in the field of manufacturing meat products - Introducing the student to the meat science curriculum, meat animals, and the chemical composition of meat - Helping students understand the syllabuses and vocabulary of the science and meat products curriculum. - Identifying the most important meat products available in local markets Practical practice of the most important meat production projects
-------------------	---

9. Teaching and Learning Strategies

Strategy	Enabling students to think and analyze topics related to the intellectual framework of the subject administration and production Domestic birds. Enabling students to think and analyze topics related to measuring productivity. Enabling students to think and analyze how to provide environmental conditions that affect poultry birds and their relationship to their production and health status. Enabling students to think and analyze to identify the best prevailing poultry projects and their relationship to animal production.
----------	---

10. Course Structure

Week	Hours	Required learning	Unit or Subject Name	Learning Method	Evaluation Method
1	5	. A general introduction to meat	Introducing students to general information about	Teaching method	the exams Daily and monthly

2	5	the origin of meat	Introducing students to the origin of animals	Lectures Theoretical and practical	the exams Daily and monthly
3	5	Quantitative traits.	Introducing students to the Quantitative traits	Lectures Theoretical and practical	the exams Daily and monthly
4	5	Components of carcasses	Introducing students to the carcasses	Lectures Theoretical and practical	the exams Daily and monthly
5	5	Myofibrils	. Introducing students to muscle fibers	Lectures Theoretical and practical	the exams Daily and monthly
6	5	Connective tissue	Introducing students to general information about	Lectures Theoretical and practical	the exams Daily and monthly
7	5	Bones and cartilage	Management and care of Bones and cartilage	Lectures Theoretical and practical	the exams Daily and monthly
8	5	Chemical composition of meat	Management and care of Chemical composition of	Lectures Theoretical and practical	the exams Daily and monthly
9	5	Post-slaughter changes	Forced mowing.	Lectures Theoretical and practical	the exams Daily and monthly
10	5	Throwing stiffness	Management and Throwing stiffness.	Lectures Theoretical and practical	the exams Daily and monthly
11	5	Throwing stiffness Quality	Feed mill management.	Lectures Theoretical and practical	the exams Daily and monthly
12	5	Quality characteristics of cooked	Quality characteristics management.	Lectures Theoretical and practical	the exams Daily and monthly
13	5	Cooking meat	Cooking meat management	Lectures Theoretical and practical	the exams Daily and monthly

14	5	Meat preservation	Meat preservation	Lectures Theoretical and practical	the exams Daily and monthly
15		Exame			

11. Course Evaluation

- Daily exams with multiple-choice questions that require scientific skills.
- Daily exams with scientific questions.
- Participation grades for competition questions for academic subjects.
- Marking homework and reports
- - Grades for the student's activity during the lecture and the extent of his commitment to regular attendance and absence.

12. Learning and Teaching Sources

Required Textbooks (Curricular Books, If Any)	Meat Science Warrior Taher Abdel Hamid 1990

Course Description Form

1. Course Name:
Poultry Nutrition
2. Course Code:
PONU412
3. Semester / Year:
First semester Fourth
4. Description Preparation Date:
23-2-2025
5. Available Attendance Forms:
Attending
6. Number of Credit Hours (Total) / Number of Units (Total)
5. Hours per week 3.5 unit
7. Course Administrator's Name (Mention All, If More Than One Name)
Name: Prof. Dr. Rabia Jaddoa Abbas Email: rabia.jaddoa@uobasrah.edu.iq
8. Course Objectives

Course Objectives	Graduating students capable of 1-Work in poultry farming and production projects and feed factories, to have theoretical and applied knowledge regarding poultry feed material, and to obtain the skills required for the post-graduation plan (postgraduate studies.) 2 -The student learns about the components of the raw feed materials commonly used in poultry diets, the percentage of use of each feed ingredient, the percentage of use of each nutritional element in the diet, and their importance in poultry nutrition. 3- Providing students with sufficient information on preparing, composing, and mixing feed ingredients to prepare balanced diets according to scientific and economic principles for various types of poultry birds at different
--------------------------	---

9. Teaching and Learning Strategies

Strategy	Graduating capable students on me: A- The course aims to develop students' ability to think critically about poultry feeding concepts B- The course aims to enhance students' analytical skills in poultry diet formulation, with a focus on cost-effectiveness and profit maximization. C- The course aims to equip students with knowledge of economically viable feed materials and scientific techniques for preparing, storing, and maintaining feed quality.
-----------------	--

10. Course Structure

Week	Hours	Required Learning	Unit or Subject Name	Learning Method	Evaluation Method
1	5	Students are introduced to general poultry nutrition information	The relationship between nutrition science and other sciences, nutritional terms, the composition of	Teaching method	the exams Daily and monthly And final reports daily

2	5	Introducing students to the concept of nutrients, focusing on energy.	Learn about energy, why birds need it, the energy efficiency of birds, the biological partitioning of energy.	Lectures Theoretical and practical + Display methods + Dialogue and	the exams Daily and monthly And final reports daily
3	5	Explaining and clarifying the types of energy and their importance for	Symptoms of a deficiency of energy in the diets - Symptoms of an increase in energy in	Lectures Theoretical and practical + Display methods	the exams Daily and monthly And final reports
4	5	Introducing students to the main energy sources in poultry feed -	Carbohydrates - their functions - division of carbohydrates - nutritional and chemical division of	Lectures Theoretical and practical + Display methods	the exams Daily and monthly And final reports
5	5	Introducing students to the main energy sources in poultry feed -	Fats as an energy source - fat classification - benefits of fats in poultry diets - harms	Lectures Theoretical and practical + Display methods	the exams Daily and monthly And final reports
6	5	Introducing students to the main sources of protein in poultry feed.	Proteins - reasons for not using protein as energy source in bird diets - classification of proteins - Types of	Lectures Theoretical and practical + Display methods	the exams Daily and monthly And final reports
7	5	Introducing students to the importance of proteins and evaluating the quality of proteins used	The importance of proteins in poultry nutrition - Plant proteins - Animal proteins - The biological value of protein.	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily

8	5	A detailed explanation of the importance of amino acids and the birds' needs for them.	Amino acids - Their importance and benefits in the body - The effect of increasing or decreasing the level of protein or amino acids on the bird -	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily
9	5	A detailed explanation of the importance of vitamins and the birds' needs for them.	Vitamins - Birds are very sensitive to the level of vitamins in the feed provided to them - Classification of vitamins - The difference between	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily
10	5	A detailed explanation of the importance of vitamins and the birds' needs for them.	Factors affecting the requirement of poultry birds for vitamins - natural sources of vitamins - industrial vitamins - symptoms of vitamin	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily
11	5	A detailed explanation of the importance of inorganic elements and the birds' requirements	Inorganic elements (minerals) - Main mineral elements - Trace mineral elements - Functions of inorganic elements	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily

12	5	A detailed explanation of the importance of inorganic elements and the birds' requirements for them, and a discussion of the mineral	Reasons that lead to a deficiency of nutrients in bird diets - calcium and phosphorus - functions of calcium in the body - sources of calcium - functions	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily
13	5	Introducing students to the digestive system of poultry birds, the functions of the parts, and the role of	The digestive system of poultry birds - the oral cavity - the salivary glands - the functions of the parts of the esophagus - the crop - the gizzard - the small and large	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily
14	5	Introducing students to digestive enzymes and the role of each	Identifying digestive enzymes, their secretory part, and endocrine secretions that are related to the	Lectures Theoretical and practical + Display methods	the exams Daily and monthly And final reports
15		Exame			

11. Course Evaluation

- Daily exams with multiple-choice questions that require scientific skills.
- Daily exams with scientific questions.
- Participation grades for competition questions for academic subjects.
- Marking homework and reports
- - Grades for the student's activity during the lecture and the extent of his commitment to regular attendance and absence.

12. Learning and Teaching Sources	
Required Textbooks (Curricular Books, If Any)	Al-Yassin, Ali Abdul Khaleq, and Abdul Abbas, Muhammad Hassan (2010), Nutrition of Poultry, University of Baghdad, College Ibrahim, Ismail Khalil (2013). Basics of poultry nutrition, Dar Al-Kutub Al-Ilmiyya - Beirut, first edition, 400 pages.
Main References (Sources)	Al-Kassar, Ali Mahmoud and Jawad, Ammar Hussein and Al-Kassar, Ali Saif. (2021).
Recommended Books and References (Scientific Journals, Reports...)	- Various classification research and university Theses for poultry nutrition. - Relevant information available on the Internet. - Information available in local, Arab, and International periodicals that are relevant to

Course Description Form

1. Course Name:
Poultry Nutrition /practical
2. Course Code:
PONU412
3. Semester / Year:
First semester / Fourth
4. Description Preparation Date:
1-2-2025
5. Available Attendance Forms:
Attending
6. Number of Credit Hours (Total) / Number of Units (Total)
5 hours per week for 3.5 unit
7. Course Administrator's Name (Mention All, If More Than One Name)
Name: Assist. teach. Tarek Ibrahim Majed Email: tarik.majed@uobasrah.edu.iq
8. Course Objectives

Course Objectives	Graduating capable students on me: • Understand the nutritional needs of different types of poultry and how they vary depending on age, stage of production, and environmental factors • To learn how to select, formulate and mix appropriate feed ingredients that are beneficial to the growth, health and productivity of poultry • To evaluate the quality and availability of different feed resources and how to reduce feed waste and cost • Apply feeding and management practices that improve performance, welfare and product quality of poultry.
-------------------	---

9. Teaching and Learning Strategies

Strategy	5. Explains the importance of poultry nutrition and how it affects the health, well-being and productivity of birds. 6. Use examples and pictures to illustrate different types of poultry, their nutritional requirements, and common feed ingredients used in poultry diets. 7. Conduct a demonstration or practical activity where students can observe, measure and compare feed intake, weight gain and egg production of different groups of poultry fed different diets.
----------	---

10. Course Structure

Week	Hours	Required learning outcomes	Unit or Subject Name	Learning Method	Evaluation Method

1	5	Introducing students to general information about poultry	General introduction to poultry nutrition	Teaching method	the exams Daily and monthly And final reports daily
2	5	clarification For students How the digestive system of poultry	Digestive system of poultry	Lectures Theoretical and practical + Display methods +Dialogue and discussion	the exams Daily and monthly And final reports daily
3	5	Explanation and clarification of the digestion process in	Types of digestion in poultry	Lectures Theoretical and practical + Display methods +Dialogue and discussion	the exams Daily and monthly And final reports daily
4	5	Clarifying the energy needs of broilers	Broilers and energy needs .	Lectures Theoretical and practical + Display methods +Dialogue and	the exams Daily and monthly And final reports
5	5	Clarifying the energy needs of laying hens	Laying hens and energy needs .	Lectures Theoretical and practical + Display methods +Dialogue and	the exams Daily and monthly And final reports

6	5	Introducing students to how to calculate the energy needs of poultry	Examples of energy needs .	Lectures Theoretical and practical + Display methods +Dialogue and discussion	the exams Daily and monthly And final reports daily
7	5	Clarifying the protein needs of broilers.	Protein needs of broilers.	Lectures Theoretical and practical + Display methods +Dialogue and	the exams Daily and monthly And final reports
8	5	Exam		Lectures Theoretical and practical + Display methods +Dialogue and	the exams Daily and monthly And final reports
9	5	Clarifying the protein needs of laying hens	Laying hens and their protein needs .	Lectures Theoretical and practical + Display methods +Dialogue and discussion	the exams Daily and monthly And final reports daily
10	5	Introducing students to how to calculate the protein needs of	Examples of protein needs for broilers and layers.	Lectures Theoretical and practical + Display methods +Dialogue and discussion	the exams Daily and monthly And final reports daily
11	5		Feed conversion efficiency .	Lectures Theoretical and practical + Display methods	the exams Daily and monthly And final

12	5	An explanation of the importance	Feed conversion efficiency .	Lectures Theoretical and practical + Display methods	the exams Daily and monthly And final
13	5	Explaining to students how to calculate the feed conversion	Examples of calculating feed conversion efficiency	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily
14	5	Most important explanation and clarification Material Fodder Common the use in feed Poultry	Material Fodder Common the use in feed Poultry	Lectures Theoretical and practical + Display methods + Dialogue and discussion	the exams Daily and monthly And final reports daily
15		Exame			

11. Course Evaluation

- Daily exams with multiple-choice questions that require scientific skills.
- Daily exams with scientific questions.
- Participation grades for competition questions for academic subjects.
- Marking homework and reports
- - Grades for the student's activity during the lecture and the extent of his commitment to regular attendance and absence.

12. Learning and Teaching Sources

Required textbooks (methodology, if (any	Yassin , Ali Abdel Khaleq, Mohamed Hassan Abdel Abbas S (2010). Feeding poultry birds . Basra

1. Course Name:
poultry management and production
2. Course Code:
POPR416
3. Semester / Year:
First semester Fourth
4. Description Preparation Date:
1/2/2025
5. Available Attendance Forms:
Attending
6. Number of Credit Hours (Total) / Number of Units (Total)
5 hours per week 3.5 unit
7. Course Administrator's Name (Mention All, If More Than One Name)
Name: Assist. Prof. Sabah Kadhum Marzooq Email: sabah.kadhum@uobasrah.edu.iq
8. Course Objectives

Course Objectives	Graduating capable students on me: - Working in the field Poultry breeding and production They have theoretical and applied knowledge regarding the subject Poultry production and management. - Obtaining the skills required for a post-graduation plan (Studies upper). - Applying for external examinations by local / regional / international bodies. - Thinking and analysis skills that enable arriving at knowledge How to establish, prepare and supervise poultry farming projects. - Providing students with work skills in the Field Scientific, research and study poultry And its relationship to wealth animal.
-------------------	--

9. Teaching and Learning Strategies

Strategy	Enabling students to think and analyze topics related to the intellectual framework of the subject administration and production Domestic birds. Enabling students to think and analyze topics related to measuring productivity. Enabling students to think and analyze how to provide environmental conditions that affect poultry birds and their relationship to their production and health status. Enabling students to think and analyze to identify the best prevailing poultry projects and their relationship to animal production.
----------	---

10. Course Structure

Week	Hours	Required learning	Unit or Subject Name	Learning Method	Evaluation Method
1	5	Introducing students to general	General introduction to poultry	Teaching method	the exams Daily and monthly

2	5	Introducing students to the components of	Hatchery management.	Lectures Theoretical and practical	the exams Daily and monthly
3	5	Explain and clarify the environmental	Environmental factors that affect poultry	Lectures Theoretical and practical	the exams Daily and monthly
4	5	Introducing students to bird habitats, their	Poultry housing.	Lectures Theoretical and practical	the exams Daily and monthly
5	5	Introducing students to all the requirements	Poultry farming supplies.	Lectures Theoretical and practical	the exams Daily and monthly
6	5	Introducing students to the requirements for	Management and care of broilers.	Lectures Theoretical and practical	the exams Daily and monthly
7	5	Explaining and clarifying the requirements	Management and care of laying hens.	Lectures Theoretical and practical	the exams Daily and monthly
8	5	A detailed explanation of the requirements	Management and care of brood hens.	Lectures Theoretical and practical	the exams Daily and monthly
9	5	Introducing the importance of forced mowing,	Forced mowing.	Lectures Theoretical and practical	the exams Daily and monthly
10	5	Explaining and clarifying the feed materials	Management and nutrition.	Lectures Theoretical and practical	the exams Daily and monthly
11	5	Introducing the characteristics and management	Feed mill management.	Lectures Theoretical and practical	the exams Daily and monthly
12	5	A detailed explanation of bird	Poultry slaughterhouse management.	Lectures Theoretical and practical	the exams Daily and monthly
13	5	Introducing students to the relationship of	Poultry management in hot climates.	Lectures Theoretical and practical	the exams Daily and monthly

14	5	Introducing students to how to deal with bird	Poultry droppings and offal.	Lectures Theoretical and practical	the exams Daily and monthly
15		Exame			

11. Course Evaluation

- Daily exams with multiple-choice questions that require scientific skills.
- Daily exams with scientific questions.
- Participation grades for competition questions for academic subjects.
- Marking homework and reports
- - Grades for the student's activity during the lecture and the extent of his commitment to regular attendance and absence.

12. Learning and Teaching Sources

Required Textbooks (Curricular Books, If Any)	Al-Zubaidi, Suhaib Saeed Alwan (1986). Poultry management. Basra University Press.
Main References (Sources)	Naji, Saad Abdel-Hussein (2017). IntaCcommercial for eggs. Nour Press. Naji, Saad Abdel-Hussein (2017)productionPoultry business. Nour
Recommended Books and References (Scientific Journals, Reports...)	Various classification research and university thesesdomestic birds

Course Description Form

1. Course Name:	
Poultry Breeding	
2. Course Code:	
POBR413	
3. Semester / Year:	
first semester / Fourth	
4. Description Preparation Date:	
11-12-2024	
5. Available Attendance Forms:	
Attending	
6. Number of Credit Hours (Total) / Number of Units (Total)	
5 hours per week 3.5 unit	
7. Course Administrator's Name (Mention All, If More Than One Name)	
Name: Assist. Prof. Sajida Abdulsemed Mejeed Email: Sajida.mejeed@uobasrah.edu.iq	
8. Course Objectives	
Course Objectives	1-Presenting students to work in the genetic improving field. 2-Achieve skills after graduation. 3-Submission for local and international tests. 4-Achieve skills in the collection of genetic information and study its production ability and improving it by the genetic improving methods.
9. Teaching and Learning Strategies	

Strategy	1-Understanding methods of genetic improvement methods and the means 2-Understanding the genetic parameters and their mathematical calculation. 3-Enable the students to develop genetic improvement programs. 4-Developing skills related to the solutions of the dominance types and the gene action. 5-The possibility of applying what has been mentioned in the field work and in the establishment of the poultry projects.
----------	--

10. Course Structure

Week	Hours	Required learning outcomes	Unit or Subject Name	Learning Method	Evaluation Method
1	5	Poultry breeding science. The theories of the chickens origion.	Introduction about Genetic science, and the poultry species classification.	Teaching method	the exams Daily and monthly And final
2	5	Emerging and distribution of poltry breeds in the world.	Ttpes of the poultry breeds.	Lectures Theoretical and practical + Display	the exams Daily and monthly And final
3	5	The mendels laws in genetics. Qualitative and quantitative traits.	The gene actions. The dominance types.	Lectures Theoretical and practical + Display	the exams Daily and monthly And final
4	5	Phenotype variation and its components.	Mathematical equations of the phenotype variation.	Lectures Theoretical and practical + Display	the exams Daily and monthly And final
5	5	Heritability, its importance, its application in poultry breeding.	Determination of Heritability by practical questions.	Lectures Theoretical and practical + Display	the exams Daily and monthly And final
6	5	Genetic selection, its importance, its types.	Calculation selection by practical questions.	Lectures Theoretical and practical + Display	the exams Daily and monthly And final
7	5	Inbreeding, coefficient of inbreeding,coefficient of relationship	Calculation of inbreeding coefficient and relationship coefficient.	Lectures Theoretical and practical + Display	the exams Daily and monthly And final

8	5	Outbreeding, calculation of heterosis. Advantages and disadvantages.	Calculation of the heterosis.	Lectures Theoretical and practical + Display	the exams Daily and monthly And final
9	5	Genetic improving of the broilers.	Characterization of the broiler chickens, genetic improving of it.	Lectures Theoretical and practical + Display	the exams Daily and monthly And final
10	5	Genetic improving of the layers.	Characterization of the layers, genetic improving of it.	Lectures Theoretical and practical + Display	the exams Daily and monthly And final
11	5	The genes responsible of quality and quantity traits.	Questions and resolves.	Lectures Theoretical and practical + Display	the exams Daily and monthly And final
12	5	The recent techniques in poultry improvement.	Molecular genetics application in poultry improvement.	Lectures Theoretical and practical + Display	the exams Daily and monthly And final
13	5	The inheritance of the lethal genes in the chickens.	The inheritance of the mutations in the chickens.	Lectures Theoretical and practical + Display	the exams Daily and monthly And final
14	5	Genetic engineering applications in the chickens.	Genetic modification in the chickens.	Lectures Theoretical and practical + Display	the exams Daily and monthly And final
15			Exame		

11. Course Evaluation

- Daily exams with multiple-choice questions that require scientific skills.
- Daily exams with scientific questions.
- Participation grades for competition questions for academic subjects.
- Marking homework and reports
- - Grades for the student's activity during the lecture and the extent of his commitment to regular attendance and absence.

12. Learning and Teaching Sources

Required Textbooks (Curricular Books, If Any)	Poultry breeding (2011). College of Agriculture. Diyala University. Khalid H.
Main References (Sources)	Understnding Animal Breedin Richard M.Bourdon

Course description form

1. Course name
Production of sheep and goats
2. Course code
SHPR419
3. Semester/year
First semester/Fourth
4. The date this description was prepared
23-12-2024
5. Available attendance forms
Attending
6. Number of study hours (total)/number of units (total)
5 hours per week 3.5 unit
7. Name of the course administrator (if more than one name is mentioned)
the name: Prof. Imad Falah Hassan (theoretical subject) Prof. Dr. Falah Abdul Mohsen Abdullah (practical subject) Email: amad.hassan@uobasrah.edu.iq And falah.abd_allah@uobasrah.edu.iq
8. Course objectives

Graduating students capable of: - Working in the field of breeding and production • Sheep And They have information Theoretical and applied related Breeding and producing sheep and goats. Through field lessons in this field and obtaining the skills required for the post-graduation plan (postgraduate studies). - Participation in scientific courses and workshops to acquire additional information to achieve scientific goals in the field of breeding and production of sheep and goats. . - Participation and interest in establishing small projects in the field of sheep and goat breeding to gain experience and skills Which enables students To gain knowledge of how to create and prepare projects Raising sheep and goats And supervising it. - Providing students with work skills in scientific, research and study fields For sheep and goats And his relationship The local and global economy.	Objectives of the study subject
9. Teaching and learning strategies	
Enabling students to think and analyze topics related to the intellectual and research framework of the subject of sheep and goat production Enabling students to think and analyze topics related to measuring education and production. Enabling students to think and analyze how to provide environmental conditions that affect sheep and goats and study the environmental and administrative conditions and their relationship to the productive and health status of these animals. 4- Enabling students to think and analyze to identify the most important points that must be followed regarding the success of sheep and goat breeding and production projects and their relationship to increasing and developing animal production.	The strategy
10. Course structure	

Evaluation method	Learning method	Name of the unit or topic	Required learning outcomes	hours	the week
the exams Daily and monthly And final reports Daily	Lectures Theoretical and practical +Display methods +Dialogue	A general introduction to sheep production and the most important local and international breeds	Introduction to sheep breeds	5	1
the exams Daily and monthly And final reports Daily	Lectures Theoretical and practical +Display methods +Dialogue	A general introduction to goat production and the most important local and international breeds	Introduction to goat breeds		2
the exams Daily and monthly And final reports Daily	Lectures Theoretical and practical +Display methods +Dialogue and	.Learn how to establish flocks of sheep and goats and discuss with students the practical and applied aspects of establishing projects for raising these animals.	Establishing a flock of sheep		3
the exams Daily and monthly And final reports Daily	Lectures Theoretical and practical +Display methods +Dialogue and discussion	Introducing students to how to establish sheep and goat barns in a way that suits the economic aspect and environmental conditions.	Sheep breeding pens		4
the exams Daily and monthly And final reports Daily	Lectures Theoretical and practical +Display methods +Dialogue and	A complete practical explanation of preparing for the pollination season and what are the most important things to take into consideration	Tests and preparation for the vaccination season		5

the exams Daily and monthly And final reports Daily	Lectures Theoretical and practical +Display methods +Dialogue	A detailed explanation of feeding sheep and goats and what are the problems facing their feeding from an economic standpoint.	Nutritional needs of sheep		6
the exams Daily and monthly And final reports Daily	Lectures Theoretical and practical +Display methods +Dialogue	Identify the most important things that must be taken into account during pregnancy and childbirth in sheep and goats.	Pregnancy and childbirth in sheep and goats		7
the exams Daily and monthly And final reports Daily	Lectures Theoretical and practical +Display methods +Dialogue and	A detailed explanation of the factors affecting the ovulation rate of sheep and goats, with some samples of the ovaries of these animals brought to the laboratory and examined by the	Ovulation rate and factors affecting it		8
the exams Daily and monthly And final reports Daily	Lectures Theoretical and practical +Display methods +Dialogue and	Studying the most important methods used to fatten sheep and goats, linking the economic feasibility.	Sheep and goat fattening projects		9
the exams Daily and monthly And final reports Daily	Lectures Theoretical and practical +Display methods +Dialogue and	Identifying the most important diseases that affect sheep and goats, preventing infection with these diseases, and methods of treating them	The most important diseases that affect sheep and ways to prevent them		10
the exams Daily and monthly And final reports Daily	Lectures Theoretical and practical +Display methods +Dialogue and	A detailed explanation of sheep and goat slaughter, along with watching some educational videos that explain the work inside modern slaughterhouses.	Characteristics of carcasses and main cuts in sheep		11

the exams Daily and monthly And final reports Daily	Lectures Theoretical and practical +Display methods +Dialogue and discussion	Identify the most important administrative and field operations that ensure the safety of sheep and goats and avoid many obstacles during the spring months.	Sheep breeding calendar (January- February), March).		12
the exams Daily and monthly And final reports Daily	Lectures Theoretical and practical +Display methods +Dialogue	Identifying the most important administrative and field operations that ensure the safety of sheep and goats and avoiding many obstacles during the hot months,	Calendar Sheep raising (April, May, June).		13
the exams Daily and monthly And final reports Daily	Lectures Theoretical and practical +Display methods +Dialogue and discussion	Studying the effect of heat stress and the extent of its impact on raising sheep and goats.	Sheep breeding calendar August, September		14
			Exame		15

11. Course evaluation

- Daily exams with multiple-choice questions that require scientific skills.
- Daily exams with scientific questions And Duties And preparing scientific reports..
- Participation grades for competition questions for academic subjects.
- Benefit Office hours for the subject teacher To answer On student questions.
- Grades for student activity during the lecture And holding scientific trips with students to local sheep and goat herds.

12. Learning and teaching resources

Methodical books: Sheep and Goat Production Book / Prof. Dr. Muzaffar Nafi'	Required textbooks (methodology, if any)
Reproduction physiology, artificial insemination, and reproductive care / Dr.	Main references (sources)
Various classification research and university theses Sheep and goats	Recommended supporting books and references (scientific journals, reports...)
https://youtu.be/4vhLKDVr8ww?si=w6Rq7FUrMivcUcVi	Electronic references, websites

Course Description Form

1. Course Name:	
Dairy Cattle Production	
2. Course Code:	
CAPR420	
3. Semester / Year:	
Second Semester/ Fourth	
4. Description Preparation Date:	
2-12-2024	
5. Available Attendance Forms:	
Attending	
6. Number of Credit Hours (Total) / Number of Units (Total)	
5 hours per week 3.5 unit	
7. Course Administrator's Name (Mention All, If More Than One Name)	
Name: Assoc. Prof. Muntaha Yaqoub Youssef Email: muntaha.yousief@uobasrah.edu.iq	
8. Course Objectives	
Course Objectives	Graduating students who are able to: - Work in the field of breeding and production Cattle Have theoretical and applied knowledge regarding the material management and production Milk cattle. Obtain the skills required for a post-graduate plan (postgraduate). - Submission of external exams by local/regional/international bodies. - Thinking and analysis skills that enable access to knowledge of how to establish, prepare and supervise cow breeding projects . - Providing students with work skills in scientific and research fields and the studyof cows and its relationship to livestock.
9. Teaching and Learning Strategies	

Strategy	Enable students to think and analyze topics related to the intellectual framework of cow production. Enable students to think and analyze topics related to productivity measurement. Enable students to think and analyze how to provide environmental conditions that affect livestock production and their relationship to their productive and health status. 4- Enabling students to think and analyze to identify the best prevailing livestock projects and their relationship to animal production.
----------	---

10. Course Structure

Week	Hours	Required learning	Unit or Subject Name	Learning Method	Evaluation Method
1	5	CAPR420Poultry breeding science. The theories of the chickens origin.	General introduction to the production of milk cows	Lectures Theoretical and practical + Views +Dialogue and discussion	auditions Daily & Monthly Final and Reports Daily
2	5	Introduce students to the ingredients of milk production.	Breeds of milk cows	Lectures Theoretical and practical + Views +Dialogue and discussion	auditions Daily & Monthly Final and Reports Daily
3	5	Explain and clarify the environmental factors affecting milk production.	Environmental factors affecting milk production .	Lectures Theoretical and practical + Views +Dialogue and discussion	auditions Daily & Monthly Final and Reports Daily
4	5	Phenotype variation and its components.	Mathematical equations of the phenotype variation.	Lectures Theoretical and practical + Display	the exams Daily and monthly And final

5	5	Milk production curve and factors affecting it	Mechanical milking	Lectures Theoretical and practical + Views +Dialogue and discussion	auditions Daily & Monthly Final and Reports Daily
6	5	Perseverance and methods of measuring it	Calculation of perseverance	Lectures Theoretical and practical + Views +Dialogue and discussion	auditions Daily & Monthly Final and Reports Daily
7	5	Milk excretion physiologically	Body measurements	Lectures Theoretical and practical + Views +Dialogue and discussion	auditions Daily & Monthly Final and Reports Daily
8	5	Processing the udder with blood	Udder and nipple scales	Lectures Theoretical and practical + Views +Dialogue and discussion	auditions Daily & Monthly Final and Reports Daily
9	5	Udder components	Practical study of udder components	Lectures Theoretical and practical + Views +Dialogue and discussion	auditions Daily & Monthly Final and Reports Daily
10	5	Milk composition and raw materials for milk processing	Milk composition and raw materials for milk processing	Lectures Theoretical and practical + Views +Dialogue and discussion	auditions Daily & Monthly Final and Reports Daily

11	5	Hormones responsible for milk formation	The action of hormones	Lectures Theoretical and practical + Views + Dialogue and discussion	auditions Daily & Monthly Final and Reports Daily
12	5	Care for young calves	Care for young calves	Lectures Theoretical and practical + Views + Dialogue and discussion	auditions Daily & Monthly Final and Reports Daily
13	5	Reproductive efficiency of milk cows	Calculation of reproductive competence	Lectures Theoretical and practical + Views + Dialogue and discussion	auditions Daily & Monthly Final and Reports Daily
14	5	Milk cattle diets	The composition of milk cattle diets	Lectures Theoretical and practical + Views + Dialogue and discussion	auditions Daily & Monthly Final and Reports Daily
15			Exame		

11. Course Evaluation

- Daily exams with multiple-choice questions that require scientific skills.
- - Daily exams with scientific questions.
- - Participation grades for competition questions for academic subjects.
- - Grade homework and reports
- - Grades of the student's activity during the lecture and the extent of his commitment to attendance and non-absence

12. Learning and Teaching Sources

Required Textbooks (Curricular Books, If Any)	Abdellatif, Fouad (1986). Production of milk cattle. Basra University Press.
Main References (Sources)	Al-Qudsi, beautiful speaker 2020 Production of milk cattle Yaghdad University Press
Electronic references, websites	https://www.noor-book.com/%d9%83%d8%a%d8%a%a8%a8%d8%a8

Course Description Form

1. Course Name:	
Graduation Project /1	
2. Course Code:	
GRPR421	
3. Semester / Year:	
First semester/ Fourth	
4. Description Preparation Date:	
14-11-2024	
5. Available Attendance Forms:	
Attending	
6. Number of Credit Hours (Total) / Number of Units (Total)	
3 hours per week for 1 unit duration	
7. Course Administrator's Name (Mention All, If More Than One Name)	
Name: Assist. Prof. Dr. Sabah Kazem Marzouq Email : sabah.kadhoom@uobasarah.edu.iq	
8. Course Objectives	
Course Objectives: Graduating students who are able to:	Enables the student to reach knowledge: 1- One of the most important objectives of the program is to know the most important processes that take place on animal production. 2- Preparing all the requirements for establishing animal production projects by providing him with information related to the application of these projects and organizing them administratively, nutritionally, physiologically and economically.
9. Teaching and Learning Strategies	

Strategy	A- Enabling students to think and analyze topics related to the intellectual framework of the subject of a research project in animal production B- Searching for a problem and trying to solve it. C- Gathering sources and ensuring the validity of the solutions used in solving issues related to the subject. D- Interpret the results by reviewing research and sources and direct inquiry from specialists. Creating an integrated program related to animal production and trying to implement and disseminate it to improve the reality of animal production.
----------	---

10. Course Structure

Week	Hours	Required learning outcomes	Unit or Subject Name	Learning Method	Evaluation Method
1	3	Graduation Research Project	Choosing a project theme	practical	Weekly and monthly tests
2	3	Graduation Research Project	Scientific Research Plan (Research Proposal)	practical	Weekly and monthly tests
3	3	Graduation Research Project	Data and information collection	practical	Weekly and monthly tests
4	3	Graduation Research Project	Sample selection and research tools	practical	Weekly and monthly tests
5	3	Graduation Research Project	Graduation Project Writing Procedures	practical	Weekly and monthly tests
6	3	Graduation Research Project	Formal controls in the graduation project	practical	Weekly and monthly tests

7	3	Graduation Research Project	Theoretical part	practical	Weekly and monthly tests
8	3	Graduation Research Project	Submission of previous studies	practical	Weekly and monthly tests
9	3	Graduation Research Project	Theories and economic analysis of a subject Search	practical	Weekly and monthly tests
10	3	Graduation Research Project	Practical part	practical	Weekly and monthly tests
11	3	Graduation Research Project	Statistical analysis	practical	Weekly and monthly tests
12	3	Graduation Research Project	Writing tables	practical	Weekly and monthly tests
13	3	Graduation Research Project	Findings & Conclusions	practical	Weekly and monthly tests
14	3	Graduation Research Project	Recommendations	practical	Weekly and monthly tests
15	3	Graduation Research Project	Writing Resources	practical	Weekly and monthly tests

11. Course Evaluation

- 1- Reports
- 2- Seminars
- 3- Utilization of office hours for department professors
- 4- Internet
- 5- Library

12. Learning and Teaching Sources

Required Textbooks (Curricular Books, If Any)	Specialized books in animal production
Main References (Sources)	1 – Principles of Animal Production authored by Dr. Muzaffar Nafi Al-Sayegh - Dr. Taha Jassim Al-Taha - Dr. Suhaib Saeed Alwan Al-Zubaidi (1987) (Textbook). 2- Management of domestic birds authored by Dr. Suhaib Saeed Alwan (1986) - Basra University Press. 3- Poultry production translated by Dr. Musleh Hussein. 4- Poultry Products Technology authored by Dr. Hamdi Abdul Aziz Al-Fayyad, Dr. Saad Abdul Hussein Naji (1989), First Edition, Directorate of Higher Education Press - Baghdad - Iraq. 5- Sheep and Goat Production Dr. Muzaffar Nafi Al-Sayegh - Dr. Taha Jassim Al-Taha - (1987) 6- and other methodological references
Recommended Books and References (Scientific Journals, Reports...)	Various taxonomic research and theses Breeding and production of domestic birds - Information available on the relevant Internet. - Information available in local, Arab and international periodicals that are relevant to the article.

Course Description Form

1. Course Name:	
Seminars	
2. Course Code:	
SEM423	
3. Semester / Year:	
Second semester/ Fourth	
4. Description Preparation Date:	
15-2-2025	
5. Available Attendance Forms:	
Attending	
6. Number of Credit Hours (Total) / Number of Units (Total)	
1 hours per week for 1 unit duration	
7. Course Administrator's Name (Mention All, If More Than One Name)	
Name: Assist. Prof. Dr. Sabah Kazem Marzouq Email : sabah.kadhoom@uobasarah.edu.iq	
8. Course Objectives	
Course Objectives: Graduating students who are able to:	Enables the student to reach knowledge: 1-Choose the sources you want to use in the seminar. 2-Know the order of the components of the seminar. 3-Knowledge of the recent programs used in the presentation of the seminar. 4-Student self-development. 5-Knowledge of managing dialogue and discussion.
9. Teaching and Learning Strategies	

Strategy	A- Enabling students to learn about the latest research related to animal production. B- Enable the student to search for sources and how to make the seminar using PowerPoint. C- Enabling the student to choose the appropriate method to meet the seminar in front of professors and students . D- Enabling the student to manage the themes of the seminar discussion . E- Self-development of the student to enable him to manage the dialogue. Access to modern means in the presentation of results and data such as audio and visual.
----------	---

10. Course Structure

Week	Hours	Required learning	Unit or Subject Name	Learning Method	Evaluation Method
1	1 Theoretical	Seminars	Seminar concept	theoretical	,Exams Quiz
2	1 Theoretical	Seminars	Fundamentals of seminars	theoretical	Exams ,Quiz
3	1 Theoretical	Seminars	Scientific research and its objectives	theoretical	Exams ,Quiz
4	1 Theoretical	Seminars	The problem of scientific research, the importance of	theoretical	Exams ,Quiz
5	1 Theoretical	Seminars	Scientific research hypothesis	theoretical	Exams ,Quiz
6	1 Theoretical	Seminars	Scientific Research Methodology	theoretical	,Exams Quiz

7	1 Theoretical	Seminars	Types of scientific research	theoretical	Exams ,Quiz
8	1 Theoretical	Seminars	Data collection tools and methods	theoretical	Exams ,Quiz
9	1 Theoretical	Seminars	Specifications of a successful scientific researcher	theoretical	Exams ,Quiz
10	1 Theoretical	Seminars	Sample and population	theoretical	,Exams Quiz
11	1 Theoretical	Seminars	Sample selection steps	theoretical	,Exams Quiz
12	1 Theoretical	Seminars	Data classification	theoretical	,Exams Quiz
13	1 Theoretical	Seminars	Means of data classification and methods of tabulation	theoretical	,Exams Quiz
14	1 Theoretical	Seminars	Tables, figures and appendices	theoretical	,Exams Quiz
15	1 Theoretical	Seminars	How to write sources The student delivers a seminar	theoretical	Exams, Quiz

11. Course Evaluation

1-Seminars
2-Discussions

12. Learning and Teaching Sources

Required Textbooks (Curricular Books, If Any)

Required textbooks (methodology, if any)
